WISER, NOT LESS STATE SPENDING ISRECOMMENDED

Virginia Institute Group Agrees on Most Practicable Economy Move

UNITS CONSOLIDATION SEEN AS ONE METHOD

Placing Competent Men in Office Is Declared Paramount Requirement

By & Staff Correspondent CHARLOTTESVILLE, Va., Aug. 20
—Wiser spending, rather than less
spending, was emphasized as a solution for the problem of mounting
costs of government in the conclusions reached after a fortnight's discussion by the Institute of Public Affairs round table on taxation headed by Mark Graves, New York STEADY GROWTH

Outlining three outstanding needs in public administration, Mr. Graves in public administration, Mr. Graves recommended three major reforms to meet them, as follows: Reorganization and consolidation of governmental units; installation of cost accounting, centrai purchasing, and similar modern business methods; and the placing of competent men in public office.

public office.

During its two weeks of deliberations, which came to a close today,
this group came to a general agreement that the cost of governmental
activities of all units is mounting
and will continue to increase; that
public welfare and the demands of public welfare and the demands of a growing and prosperous Nation, particularly in the matter of good roads and education, justifies increased costs; and that the so-called "burden of taxation," which for all units of government amounts to \$11,000,000,000 a year, while greatly in need of a more equitable redistribution, is not, in proportion to the national income of \$90,000,000,000 to \$100,000,000,000 ayear, excessive.

Economy Need Recognized

Outdoor Theater **Employs Vast Sets** 

By the Associated Press
St. Louis, Mo.
ERECTING scenery for St. Louis
municipal outdoor theater
where opera is staged the summer
through is almost a job for a build-

ng contractor.
The sky is the limit. Where indoor theaters roll down a drop to depict a building, imitation houses, walls and rocks are built on the vast outdoor stage, which is 120 feet wide and 90 feet deep. Seenic castles and cathedrals 40 feet high often are erected. Even a river which courses behind the stage was used for one scene.

In another opera the patrons saw a horse and carriage approaching at a distance of 170 feet from the apron of the stage. The effect was obtained by extending the stage to a bridge over the river. More than 9000 seats are pro-vided for the audience on a hill stretching away from the stage.

## IN CO-OPERATIVE WORK PREDICTED

Future of Agricultural Movement "What We Make said Professor Shepherd, into which It," Says Dr. Nourse

STORRS, Conn., Aug. 20 (Special) -"The future of agricultural cooperation in the United States will be just what we elect to make it." declared Dr. E. G. Nourse of the United States Department of Agriculture in his address on "The culture in his address on "The Future of Co-operation in the United States," which brought to a close the first New England School and Institute of Co-operative Marketing, held during the last four days at Connecticut Agricultural College. "For myself," he said, "I believe we shall move steadily forward."

Despite this commensus that in view of the needs and demands of the growing and wealthy nation there is little, if any, prospect for an early letting up in the mounting of governmental expenditures, there was evidenced an equally strong sentiment that some form of economy in the administration of public business is greatly needed.

To this view, Mr. Graves, a tax authority, and a public official of important responsibilities in his State for many years, responded with a group of concrete suggestions, which in his own words constituted a program for effecting economies in the use of the tax dollar. It was significent, that Mr. Graves in his plan did not stress curtailment of expenditures, but emphasized economy; not

ittle, if any, propeof for an early plating up in the mounting of governmental expenditures, there was evidenced an equally strong sentiment that some form of economy in the administration of public business a greatly needed.

To this view, Mr. Graves, a tax suthority, and a public official condition of the contract of the portant responsibilities in his State for many years, responded with a group of concrete suggestions, which his own words constituted a program for effecting economies in the and not not many due to the contract and not not many due to the contract and sent and the modernising the conduct of public business.

This fact, in view of the wide-spread discussion of mounting governmental expenditures, is of deep interest. It recalled that at the recent Governors conference at Macking Island, Mich., aithough most of the state executives decried the constant upward trend of outlay for public purposes, not one had a program for actually reducing the outgo.

Many told of "economies in the large sums in the large showings in the upper exhibition hall are by Jelle Roos, concord; Seabrook Nurseries, Seabrook, N. H.; George N. Smith, Wellesley, and William E. Clark, Sharon.

Many told of "conomies in the large sums in the large sums in the large sums in the large showings in the upper exhibition hall are by Jelle Roos, or concrete s use of the tax dollar" they had instituted, and the large sums in some instances that had been saved, but even these governors admitted that the total of expenditures had increased during their "economy administration."

The Expended state of the tax dollar" they had been disposed to worship the past instead of carving the future, then the outlook for co-operative marketing is bad. The possibilities of co-operative marketing is bad. agriculture will be largely unreal-

## FEDERAL BOARD TO INVESTIGATE LIVING COSTS

Facts and Data of Value to **Business and Industry** Are Assured

FAIR PRACTICES AND PRICES URGED

Three Definite Modes of Quoting and Charging Prices Are to Be Studied

Special from Monitor Bureau WASHINGTON, Aug. 20—The nuch-discussed "high cost of living"

Trade Commissison.

Three definite modes of quoting and charging prices with reference to locality of the purchaser will be studied and reported on by the eco-nomics staff of the commission. Three such systems of price-fixing are mentioned by the commission as (1) the delivered price method, (2) the factory base method, and (3) the basing point method.

Various Practices

Numerous companies who distrib-ute their products in various states of the Union are quoting prices in which no allowance is made for dif-ference in transportation costs in ference in transportation costs in widely separated markets. This is called the delivered price method. Other distributors employ the policy of quoting uniform prices at the factory, with freight charges added according to the locality of the con-

and industry are expected to result from the commission's inquiry and Naval Seaplane to Leave the study of competitive conditions, it is hoped, will develop new and constructive measures for obtaining greater efficiency and economy. The report also will form a basis for

determining fair practices.

This will be the fourth recent und-rtaking by the commission on its own initiative for employing its

Some Interesting Examples Three years ago the commission ompleted the "Pittsburgh plus" case,

which illustrates concretely certain methods in price fixing. The large steel corporation involved was or-dered to cease and desist from its fabricators and manufacturers in the Pittsburgh district at factory prices but the same class of customers outside that district was charged, in addition to the Pittsburgh price at the factory, the freight charges from Pittsburgh to the outside point. But fabricators or manufacturers located in Chicago, who bought products from the same steel corporation's Chicago factory had to pay the Pittsburgh factory price plus the freight from Pittsburgh to Chicago.

As an example of the delivered price method, the factory may be in Baltimore but a customer in Washington, forty miles away, will pay the same price for goods delivered as will a customer in Los Angeles, 3000 miles distant. The company maintains its delivered price by charging. each customer enough to remunerate itself in the total receipts for losses sustained through long freight shipments. Broadly speaking, the Wash ington man pays the freight for the Los Angeles customer.

# Back If We Would"

By a Staff Correspondent

WILLIAMSTOWN, Aug. 20—"In
the Caribbean area we have set our
hands to the imperialist plow, and
we cannot turn back if we would."

This was the pronouncement,
made as it seemed, almost unwillingly by Prof. William R. Shepherd,
Columbia University, opening a discussion at the Institute of Politics on
the policy of the United States
toward Central America. The ensuing debate brought forth criticism
by Arthur Ruhl, New York HeraldTribune correspondent of American
"career diplomats" in that area, and
a defense of American policy in
Nicaragua by Commander J. F.
Shaferoth, United States war college, Washington.

Scanning American relations with
Caribbean countries, Professor Shepherd declared that anyone making a

Gooseberry Pie Ceremony Traced Back to Robin Hood

LIEUT. CLARENCE H. SONILDHAUER Will Attempt to Drop Pouch of Letters on L 500 Miles Off Shore on Her Way to Europe

Mansfield, Mass., Joins Mansfield, England, in Perpetuating Tradition of Famous Adventurer's Fondness for This Pastry Over All Other Delicacies

MANSFIELD, Mass., Aug. 20 (Special)—This afternoon, on the steps of the Town Hall, William Plattner, town manager of Mansfield, stepped known about it long in advance.

dressed to individuals, and 40 will be business matter.

When the express arrives in Boston at 10:52 p. m., Joseph J. Notan, superintendent of transportation of the Boston post office, will take the mail bags and hurry them to the Squantum airport, transferring their frem factory to locality of the purchaser.

The principal speaker was Joseph W. Martin, Jr., of North Attleboro, Mansfield, Last year Mr. Martin visited Mansfield, Eng., and he was told then that the town intended to invite Mansfield, Mass., to accept the

beautiful yellow prima donna and Ethlyn which is commonly counted the finest of all the oranges, make an unusually beautiful and significant display.

Although Mr. Smith's gladioli are of exceptional quality and beauty. anniversary. Why was it a goose-berry pie? Because the 700-year-old legend is that of all the delicacles liked by Robin Hood his first pref-erence was for gooseberry ple. And, since Robin Hood and the adventures of his adventurous band have a high place in the history of Mansfield, Eng., what could be more suitable than to indicate them by the annual

None More Persistent Of all the legends that have sur-ounded the career of Robin Hood none has been more persistent, in the neighborhood of its occurence, than the legend of the gooseberry pie. When Mansfield, Mass., celebrated the 150th anniversary of its settlement two years ago this coming week, correspondence that had passed between Mr. Haitner and Mayor Maltby was read. A bond has been established between the towns, of mutual good will and interest and it was decided between the two that Mansfield, Mass., could best understand the ancient tradition of the

gooseberry pie sent by Mayor Maltby to be "cut" publicly and divided among the townsfolk.

Accordingly some days ago the 20-pound pie arrived, accompanied by a message which Mr. Plattner read to-day. Part of the message had to

Records Are Sent to Complete Brief for Filing in Washington

Soon after word was received that Judge James M. Morton Jr., of the United States District Court had declined to allow a petition of habeas corpus or to grant a stay of sentence, Arthur D. Hill, chief consul for Nicola Sacco and Bartolomeo Vanzetti, departed for Beverly Farms to appeal to Justice Oliver Wendell Holmes of the United States Supreme Court for a stay for the two men.

Prior to this action an appeal for a
further respite had been sent to Governor Fuller.

ernor Fuller.

Referring to the dispatch received from Washington that Michael A. Musmanno, one of the defense counsel, had been unable to file the papers for a writ of certiorari in the United States Supreme Court, Mr. Hill said that Mr. Musmanno had "delivered" the papers, and that copies of the records needed to bring the brief to such form that it could be properly filed had been sent to

with the Supreme Court of the United States writs of certiorari in order to bring the cases before that tribunal. I have also ordered copies of the necessary records. Under these circumstances, I respectfully request that a further respite may be granted the defendants in order that the cases may be dealt with by the Supreme Court of the United States. I may add that I regret being obliged to make this further application to you and I propose taking what steps stay from some United States Court.

In view, however, of the shortness of time, it is not certain that it will be judge in the true sense." time, it is not certain that It will be possible for us to do this, and for that reason I feel constrained to make this application to you. I do not feel that the matter ought to rest in a race for time. Our petitions for certiorari were sent to the Supreme Court at Washington at the earliest possible moment subsequent to our receiving word of the adverse decision on the cases by the Supreme Judicial Court of the Commonwealth and every possible step has been and will be taken by me to expedite the cases to a final conclusion."

Mr. Hill reported that Elias Field, another of the Sacco-Vanzetti counsel, presented the new petition for a writ of habeas corpus and stay of sentence to Judge Morton in Fall showing of Mrs. Leon Douglas, showy, subtly veined rust roses, Mrs. It is a serveral to the control of the serveral serveral to the serveral serveral to the serveral serveral serveral to the serveral ser

Mr. Hill reported that Elias Field, another of the Sacco-Vanzetti counsel, presented the new petition for a writ of habeas corpus and stay of sentence to Judge Morton in Fall River this morning, but that the judge dismissed it, entered a final order to that effect, and declined to allow an appeal from this order. Mr. Hill said the papers will be brought back to Boston and filed in the United States District Court.

Picketers Are Arrested

When asked whether Justice Louis
D. Brandels of the United States
Supreme Court would be approached
for a stay of sentence for the two
men during the pendency of the writ
of certiorari, Mr. Hill said the proper
man to approach is the Justice of the
circuit, in which the matter came up,
which is Justice Holmes. Mr. Hill
intimated, however, that if Justice

Soon after Mr. Hill and his party departed for Beverly Farms, picket-ers once more took up their stand in front of the State House. Although there were only 14 of them when the march was first started the line was slowly growing when the police received orders to arrest them. There was no disorder. Every picketer went quietly with the policeman who informed them that they were under arrest and removed the placard from their hands. They were arrested and the crowd dispersed within 20 minutes of the time the march was first

signed by 17 prominent persons of New York, Washington and Boston, asking responsible persons who be-lieve in the innocence of Sacco and Vanzetti to wire to Governor Fuller

#### ALLIES DIFFER OVER QUESTION OF EVACUATION

French Willing to Reduce Force by Only 5000 on the Rhineland

By SISLEY HUDDLESTON Wireless from Monitor Bureau vi Postal Telegraph from Halifas

PARIS, Aug. 20-A decision re arding the precise figure to which the occupational troops in the Rhine-land shall be reduced has not yet been taken, since diplomatic correand England on this subject. Yet the French Cabinet provisionally has adopted the view that the French forces cannot be reduced by more than 5000 men. If the British insist on further withdrawals, then such withdrawal must be at the expense of the British. Expressed which bitter mutual accusations were made. While neither of the control versicilists in this guarrel was a figure and the second of the British. such withdrawal must be at the ex-pense of the British. Expressed bluntly, that is the French reply to British advocacy on behalf of Ger-

their own army is already insignifi-cant and cannot be reduced except proportionately as the French army reportionately as the French army so reduced, The number of men in the Rhineland perpetually changes, ut making allowances for fluctuations it is probable that at present 5,000 French and 14,000 British and Belgian soldiers patrol German terri-tory: The British favor a reduction to a maximum of 60,000 while Gerany insists that if evacuation is im-ssible now, at least the Allied cops should be brought down to the

troops should be brought down to the level of the pre-war German contingents stationed in these regions.

The German demands would mean a reduction of the allies to a total of 50,000 or even fewer, since the Germans claim they only kept 40,000 men. In fact Germany wants entire evacuation and is expected to bring up the matter formally at the League Assembly. If the allied troops drop below a certain point, it will even on military grounds be necessary to evacuate because the officers will refine to be responsible for their security.

The newspaper Impero is no longer recognized as an organ of the Fascist federations—a step which probably will lead to its suppression—while Signor Interland has been only reprimanded.

READY FOR TRIP

READY FOR TRIP

This decision is important since it marks the defeat of those persons hitherto favoring an intransigent policy and shows Fascism gradually throwing overboard those who persist in an attitude no longer necessary after the Fascists have been so

Theoretically there is a technical minimum which it ignored will automatically compel the complete liberstaion of the Rhineland. Evidently such is German calculation and the French authorities would appear definitely opposed to anything interested in the gium, which has nearly as many men in the Rhineland as England, is particularly interested in the question, and more anxious than discovered to the completion of an agreequestion, and more anxious than France that a premature step should not be taken. Though a final position has not been taken, it is not likely that there will be any radical change of view on either side.

British Views Stated

Regarding Evacuation LONDON, Aug. 20-The, British overnment's position in the conersations now proceeding with the uni d'Orsay for reducing the Rhine rmy of occupation is. The Christian Monitor representative rns that Germany's grievance hould be met by carrying out un-rudgingly the promise made by the mbassadors Conference in Novem-er, 1925, for a "considerable reduc-

Omcials of the Junkers works at Dessau asked if they were growning two planes for another attempt to fly to America, merely informing inquirers that "it all depends on the weather."

REVACUATION POLICY IN ITALY BENEFICIAL tion here.

By Wireless via Postal Telegraph from Halifax

ROME, Aug. 20—That the revaluation policy has not had the catastrophic result on Italy's export trade as it was feared would be the case

by many, both here and abroad, is evidenced by the returns of Italy's foreign trade during the first six months of this year. Compared with the figures of the corresponding period of last year, there has been an improvement in the trade balance of 1,082,000,000 lire.

The exports only diminished by 5.8 per cent while the imports diminished 16.2 per cent. Governmental financial circles are greatly satisfied with the results and express the hope that when the economic crisis is passed

when the economic crisis is passed the beneficial effects of the revalua-tion policy will be better appreciated by the whole country.

STUNTS NOT LIKED

She Says Commonplace Flying Will Do Most for Aviation

CLEVELAND, O., Aug. 20 (Special)

Offinary, commonplace flying with the stunts left out will do more to boost aviation than any other thing, Mrs. Evangeline L. Lindbergh, mother of Col. Charles A. Lindbergh, said here white visiting friends. Mrs. Lindbergh flew from Detroit in one of the tri-motored monoplanes of the Ford company.

"Air planes are for practical use," ahs said, "and they afford a pleasant and safe means of transportation. That fact must be emphasized before flying becomes general and really popular.

"Flying for business and pleasure should be as much in the public average of the property of interpretation and the inadequate emphasis on the obit-basis of the statement of the inadequate emphasis on the obit-basis of the inadequate emphasis on the obit-basis of its in inadequate emphasis on the obit-basis of its indequate emphasis on the obit-basis of its alienation."

The Portuguese view is that Macao was reded to it in the sixteeenth century by China in return for Portugues. There is no question of its alienation."

## CLOSER SCHOOL TIES ADVOCATED WITH MEXICANS

Americans See Benefits of Summer's Study at University of Mexico

MEXICO CITY, Mex., Aug. 20 (Special)—Closing exercises of the sixth summer school of the National University of Mexico marked a greater exchange of expressions of friendship and good will between American and Mexican speakers than has been heard in many months.

tended by more than the usual number of college and school professors. Several of them who have attended previous summer courses declared to The Christian Science Monitor correspondent that they believed greater progress had been made toward better understanding between both year's session than at any time pre-

fruitful results are beginning to appear from the interchange of students and teachers between the two countries which has been systematically carried on for the last six years. Dr. Paul H. Clements, Pro-fessor of Political Science at the University of Arizona, declared that a thorough knowledge of Mexico and its people is especially needed in the United States to replace the superficial knowledge which has deterred friendship between the two countries

Dr. Clements was among the speakers at the round table discusspeakers at the round table discus-sion held at the university in con-nection with the adjournment of summer classes. Latin American seeks the friendship of Americans provided the United States reciprocates it, which can best be accordished by education, he declared.

He punctuated his remarks with frequent references to recent addresses by Dr. William R. Shepherd of Columbia University at the Williams town Institute of Politics, especially sustaining Dr. Shepherd's contention that the opinion of Americans on Mexico is influenced by lack of knowledge and the belief that constant turmoil exists south of the Rio

To promote better understanding between the two countries more courses in American universities are needed dealing with Spanish and Latin-American history, sociology, geography, commercial relations, lit-erature and general Latin-American culture is the conviction derived by many attending the summer school from their experience here. Closer contacts between professors in American and Mexican universities

cational circles and newspa pers here believe much has now been

with their fragrance.

Daddy came home from the city

office on an early train, and Mummy

said they would have supper on the

lawn where they could all enjoy the

lovely garden with its gay flowers.

So Mary helped with the sandwiches,

and Jane made some lemonade all by

herself, and little James carried out

the glasses very carefully. They had

wooden plates and paper napkins,

just like a real picnic, and Daddy

gave them a big surprise with a box

of ice-cream that he had carried

from the city, packed in shaved ice.

After it was over and the sun began

to go down, Daddy said quite sud-

denly, "These flowers are so lovely

that we must have more of them. We must do some addition." Then Mummy brought out two pairs of scissors, and they cut off every sin-

gle sweet pea that was growing on the vines—pink and white and red and blue and purple and lavender— every single one! There was a big heap of them in the basket that Jane

big jars full of water waiting for flowers. If you want me to, I'll take these sweet peas in tomorrow and put them in the water. Then those thoughtful people will come and get the flowers and take them to people who have no gardens. Would you like to send them?"

"Yes," said the children, "of course we would."

"We have had them all today," said Mary, "and the city people can have them all tomorrow. That will be lovely! But it looks like subtraction,

It was a fine party.

and Mexico. Harvard, Columbia and Texas Universities are especially nentioned as having taken initial transfer transfer the structure.

## WORLD NEGROES TO OPEN SESSION

Delegates From 13 Nations Gather for Congress in New York

Special from Monitor Bureau NEW YORK, Aug. 19—Delegate from 18 countries will attend the Fourth Pan-African Congress, which In addition to several hundred will open a four-day convention here American men and women pupils on Sunday to consider conditions this year's summer school was ateconomic problems and their progress in education, art and literature

Among the delegates to the convention will be Dantes Bellegarde commander of the Legion of Honor Haitian Minister in France, and Haiti's delegates at the League of Nacountries with the conclusion of this tions; T. Augustus Toote of Nassau the Bahamas, attorney general in 1925, and a member of the House of Assembly from San Salvador; Dr. Wilhelm Mensching, of Germany, and Mrs. Helen Curtis, widow of the for-mer American Minister to Liberia.

mer American Minister to Liberia.

The American reception committee includes: Judge James A. Cobb of Washington, D. C.; John Hope, president of Morehouse College; James Weldon Johnsoon, secretary of the National Association for the Advancement of Colored People; Eugene Kinakle Jones of the Urban League; Carl Murphy, editor of the Baltimore Afro-American; Harry, E. Davis, member of the Ohio Legislature; Charles Johnson editor of Opportunity Magazine: Emmet J. Scott

Davis, member of the Ohio Legislature; Charles Johnson editor of Opportunity Magazine; Emmet J. Scott of Howard University; Dr. I. Garland Penn and Bishop R. E. Jones.

The opening session will be held in St. Mark's Methodist Episcopal Church at Edgecombe Avenue and 137th Street. Dr. W. E. B. DuBois, founder of the First Congress, will deliver an address on the History of the Pan-African Congress. This will be followed by greetings from Africa, presented by Chief Amoah III: from the Bahamas, by Mr. Toote; Barbadoes, by Bishop R. J. Barrow; Canada, by Hon. J. F. Jenkins; East Indies, by H. K. Rakhit; thaiti, by Mr. Bellegarde, and Virgin Islands, by Adolph Sixte. William Pickens will read a report of the Brussels Congress of Oppressed Races.

The convention headonayters will

Loss and Gain

Arkansas City, Kan. Special Correspondence
RAILROAD man lay in a
Stockton (Calif.) hospital.
Thirty-one years old! Only a sixth grade education! A leg gone and the only trade he knew, railroading, now an impossibility! A mother,

has not been easy. He has learned to drive cars with one leg. He has learned salesmanship. He has mastered the mechanics and the business of distributing automobiles. And today Clarence Maxey is sales manager in full charge of the used car department and vice-president of the Roseberry Motor Company here. He draws a salary nearly twice what he would ever have made at railroading and has accumulated much property. He is a Rotarian, an Elk and an active fown booster.

FROM Berlin comes a contribution telling of a little boy who had been sent to fetch the family milk in a big can and spilled its contents on the way home. E. S.-H. writes that the lad's grief was assuaged by the driver of a passing milk cart who very gladly stopped and filled up the boy's can.

AN EXAMPLE of neighborliness in the bird kingdom is recounted in one of three contributions from M. W. P. of Arkansas City, Kan. One day a fledgling orchard oriole fell from its nest. A pair of Baltimore orioles assisted the fledgling's parents in an unusual rescue.

THAT kindness of heart, as well as ready wit, is a characteristic of the English cabby is vouched for by W. W. of Malvery, Worcs, Eng. The driver having been paid for taking two women of modest means to a certain shop, waited until they had fin-ished their business and drove them ome without expense.

## SIX AIRPLANES SENT TO MARINE FORCE IN CHINA

State Department Warns Americans to Remain at Coastal Points

Special from Monitor Bureau Special from Monitor Bureau
WASHINGTON, Aug. 20—Six large
amphibian airplanes designed originally for Guam have been diverted
to China, it was learned at Marine
Corps headquarters here as the question of the right of foreigners to fly
their planes without permit over
Chinese territory was raised through
the seizure of the wings of a British
military plane near Shanghai by the
Nationalist military authorities.
When the six planes, shipped by
commercial carriers, reach their desercial carriers, reach their des-on, the United States will have ins a total air force of 21 mili-

tary ships.

Whether the air reinforcements will be landed at Shanghai or Tienstin was not announced, but it is presumed that they will be taken to the air field at Hsin Ho, near Tientain, where the marine expeditionary force has 15 land planes concentrated. It is possible, however, that the six planes will be landed at Shanghal for use along the course of the Yangtze River, or for inland the course of the Yangtze River, or for inland the course of the Yangtze River, or for inland the course of the Yangtze River, or for inland the course of the Yangtze River, or for inland the course of the Yangtze River, or for inland the course of the Yangtze River, or for inland the course of the Yangtze River. observation flights to points in the Yangtae Valley where American resi-

FAIR TO EXHIBIT FRISIAN PRODUCE

at Agricultural Event for Leeuwarden

THE HAGUE (Special Correspond ce)—An agricultural show in comfor the Frisian Agricultural y, will be held from Sept. 5-10 duwarden, the capital of the ce of Friesland. This exhibi-Il not only demonstrate what and especially Friesland. ned in the way of farming ie co-operative movement by generally in use in the

produce industry is the fact that during the

development of agriculture been much influenced by the the of agricultural associations. A series of these associations has been established, each of which has confined itself to a definite field of labor. All these corporations work together with the general agricul-tural organization, the Frisan Agricultural Society (Friesche Maat-schappli van Landbouw) the oldest in Friesland.

ESTONIA-LATVIA PACT ON TARIFF ADVANCES

Special from Monitor Bureau LONDON-The mixed commission LONDON—The mixed commission whose task is to work out the details for implementing the recent treaty, which effected a Customs Union between Estonia and Latvia will held its second session at Riga on Sept. 1, it is officially announced. The first session was held in Tallinn, Estonia, on July 5 and 6, when it was agreed to simplify customs and transport formalities and to call a conference between the banks of emission of the two countries to settle certain questions concerning

emission of the two countries to settle certain questions concerning banking and currency. The unification of the customs tariff is at present being negotiated, and it is hoped that the preliminaries will be completed in time for at least art of the revised tariff to be ac-cepted at the commission's meeting epted at the commission's meeting in Sept. 1. Meanwhile it is hoped to conclude a provisional trade agreement which will carry the two countries on temporarily until the details of the Customs Union have been worked out.

gainst which the opposition can marshal a majority vote of censure

the United States undertakes its elections at regular intervals. While the tenure in office of an American party is not thus conditioned by its strength on an issue under immediate dispute, there is apparently no dearth of public questions which will call for an align-

rempaign.

President Coolidge's succinct announcement of his withdrawal has run the gamut of varied political appraisal, and in the running it has left in its wake an appraisal, and in the running it has left in its wake an imposing array of embryonic candidacies within the Republican Party among which, to note them alphabetically, are Senator Borah, Vice-President Dawes, Herbert Hoover, Charles E. Hughes, Nicholas Longworth and Frank O. Lowden. On the Democratic side one hears most frequently, to note them no less alphabetically, of William G. McAdoo, E. T. Meredith, Senator James A. Reed and Governors Ritchie and Smith.

With the national conventions still many months in the future, discussion of candidacies remains

in the future, discussion of candidacies remains essentially speculative. But the subject matter of the 1928 campaigns is rapidly taking shape, and the problems to which these candidates must soon address themselves

are many and diverse—problems which will concern the election of a year to come and which will concern the course of the Nation for many blems which will concern the election of a years to come. The United States has before it such compelling issues as the rehabilitation of American agriculture; the restoration of the Mississippi flood lands, and the future control of the river; the proposed consolidation of a vast railroad system; the development of commercial aviation; the disposition of Muscle Shoals and the Boulder Dam project; the adoption of a waterways policy which will compass the St. Lawrence ship route, the Columbia River basin reclamation, and the impounding of the waters of the Rio Grande; the improvement of the personnel and methods of prohibition enforcement; final settlement of the debt question; delayed adjustments of the immigration law; the possible beginning of an interoceanic canal across Nicaragua; a well-balanced development of the American Navy; and the continuance of a foreign policy that will both harmonize and help conditions in China, Mexico and Latin America. +

THE news which is emanating daily from the Williamstown Institute of Politics presents nothing less than a miniature encyclopedia of the live issues of national and international affairs. To examine this news is to examine a cross-section of the best-informed world opinion. Here,

with a brevity which enforces some selection, is a recapitulation day by day from July 28 through Aug. 18, indicating the course which the institute's discussion is pursuing:

American isolation in world affairs is breaking down, and one of the signs of this changed public sentiment is the spread of gatherings similar to Williamstown .- Dr. Harry A. Gar-

field, July 28.

Viewing the one-man rulers in Russia, Italy, Poland and other smaller nations, Prof. Herbert R. Spencer is concerned lest dictatorship is tending to replace democracy. He sees public apathy toward voting in the United States a sign of this trend.—July 29.

The national safety of America demands a policy which will result in at least one-fourth of the citizens being farmers; we need a back-

of the citizens being farmers; we need a back-to-the-farm movement. — Henry A. Wallace, The ties that bind the vast British Empire

have been strengthened by the increasing inde-pendence bestowed upon the dominions, and while the dominion govern-ments are autonomous, they are unified in ideal and in ideal

pendence bestowed upon the dominions, and while the dominion governments are autonomous, they are unified in ideal and in practice.—
Sir Arthur Willert, Aug. 1.

An agricultural and political alliance between the West and the South is likely to be the outcome of the present condition of American farming.—Dr. Charles A. Beard, Aug. 2.

The growth of Christianity and the pressure of economic necessity working on an overcrowded population are basic factors in the new Chinese nationalist movement.—Stanley High and Charles C. Batchelder, respectively, Aug. 3.

respectively, Aug. 3. Most of us in Ireland prefer to remain in the British Empire. We

consider ourselves on a coequal basis with the other members of the British Commonwealth of Nations.—Miss Thekla Beere, Aug. 4.

Failure of the naval limitation conference will not impair Anglo-American relations.—Sir Arthur Willert. Perhaps it was a pity that the

Geneva Conference seemed so dominated by professional naval men-Prof. Herbert Heaton, Aug. 5. Concerning Mexican oil and land laws: When vested rights seriously impair national well-being, they are subject to be changed by national legislation.—Antonio Castro Leal. Foreign oil interests face confiscation

in Mexico; rights duly granted are being illegally taken away.—Guy It is time for the Western powers to cease trying to pick a winner in

China, and to hasten compromise among the factions by leaving them all alone.—Prof. Harold S. Quigly, Aug. 8.

Gen. Leonard Wood as Governor-General of the Philippines was the the steadiest single influence in the Far East .- Prof. Ralston Hayden, Aug. 9.

The French debt to the United States should as a matter of justice be reduced a flat \$2,000,000,000.—William T. Hornaday, Aug. 10.

There should be established a new federal farm board and a federal farm council, with wide powers to formulate their own farm remedies that they may meet American agricultural problems as they develop.

Dr. Joseph S. Davis, Aug. 11.
Germany's loss of its colonies constitutes an injustice.—Dr. Peter Reinhold. As to Italy's acquisition of South Tyrol, inhabited largely by the Germanic race: If somebody is wrong in this case it is geography and not Italy.—Count Carlo Sforza, Aug. 12.

The high cost of living has not been reduced by Fascism, and a first-lass economic conflict would bring down the whole Fascist régime.—Prof. Henry Spencer, Aug. 13.

Henry Spencer, Aug. 13.

Europe will not regain its former influence in the Far East if Japan opposes that outcome.—Thomas F. Millard, Aug. 15.

Payment of the war debts by the allied governments is intimately linked with the payment by Germany of its reparations, and the discharge of these obligations is "one of the great lessons of the World War."—Dr. George Winfield Scott, Aug. 16.

Dr. George Winfield Scott, Aug. 15.

An inter-American commission of inquiry and conciliation would be the best machinery to arbitrate the present dispute over the Mexican petroleum and agrarian laws.—Prof. William R. Shepherd, Aug. 17.

Pedro Guevara urged an official joint committee to adjust the relationship between the United States and the Philippines. W. Cameron Forbes believed the Philippines not ready for mended that an official of cabinet rank administer American overseas nossessions—Aug. 18.

ions.-Aug. 18. + + + PLEASE stand by while the Radio Editor discusses a timely develop-ment in the field of wavelengths and receptivity: It is impossible at this time to estimate the far-reaching influence of the announcement made this week by the Radio Corporation of America that the Atwater

## RATLWAY MAIL MEN TO MEET WEEK SEPT. 5

Working Problems, Postal Policy Bill, Other Issues to Come Up

More than 21,000 employees of the United States Railway Mail Service will be represented by their official delegates from every section of the United States at the twenty-eighth biennial convention of the National Railway Mail Association, which will convene at the Hotel Statler, Boston, during the week beginning Sept. 5.

A group of prominent statesmen and government officials will have an active part in the speaking and social

and government officials will have an active part in the speaking and social program, including Postmaster-General Harry S. New, Governor Fuller and practically the entire Massachusetts representation in the United States Senate and House of Representatives, who will attend the blennial banquet of the association in the Georgian Room of the Statler Thursday, Sept. 8.

The women's auxiliary of the National Railway Mail Association, which will hold sessions at the same time, will be represented by 49 delegates, 10 of whom will be from the New England district. Mrs. Herbert P. French of Wollaston is national president.

To Discuss Working Conditions

At the executive sessions of the Railway Mail Association's confer-ence it is expected that resolutions calling for various improvements in working conditions and resolves aimed to better the service and tend toward a better relationship between employees and department heads, will be introduced. Important among the problems which the convention will discuss will be the matter of hours of service; a definite standard for a day; better conditions for sub-

stitutes; night differential; steel mail cars and postal policy bill. Labor Day will be given over en-tirely to a social program. During the day the delegates will be guests on a motor tour to Concord and Lex-ington, followed by an informal reception at the Statler, and a concer

ception at the Statler, and a concert and dance.

The business session of the convention is scheduled to be opened Tuesday morning by Mr. New, followed by addresses of welcome by Governor Fuller and Mayor Nichols. Greetings from New England will be extended by George H. Moses (R.), Senator from New Hampshire; Porter H. Dale (R.), Senator from Vermont; David I. Walsh (D.), Senator from Massachusetts; and Frederick from Massachusetts; and Frederick H. Gillette (R.), Senator from Mas-sachusetts, and Jesse H. Metcalf (R.), Senator from Rhode Island. Other speakers will include James H. Meade; J. E. O'Connell, Providence (D.). Representative from Phode Meade; J. E. O'Connell, Providence (D.), Representative from Rhode Island; J. P. Glynn, Winsted, (R.) Representative from Connecticut, and E. W. Gibson, Island Pond, (R.) Representative from Vermont. The department will be represented by W. Spartment will be represented by W. Spart intendent of Service in the New Eng-land Division, Frank W. F. Yarring-ton, and R. M. Baker, Postmaster of cusse

will entertain the visiting delegates during their stay in New England. Mr. Lane is a veteran of the Railway Mail Service. When Mr. Coolidge was sworn into office by his father, Col. John Coolidge, in the Plymouth, Vt., homestead, Aug. 3, 1923, Mr. Lane journeyed to the Coolidge home and held the kerosene lamp which furnished the only illumination for Colonel Coolidge to read the oath.

## GIRL CHAMPION MOWER A LOSER IN 1927 CONTEST

#### Miss Helen Bernaby Drops Title Which Is Won by Walter Stickney

DURHAM, N. H., Aug. 20 (Special A mowing contest, in which Miss Helen Bernaby lost the champion ship to Walter Stickney of Hollis

ship to Walter Stickney of Hollis, presentation of a farm pageant, "Pioneers," awarding of prizes in the newspaper contest and several minor events, closed the program of the Farmers' and Home Makers' Week at the University of New Hampshire. A In the mowing contest Mr. Stickney, who has used the scythe for over a half a century, completely upset predictions by beating all other contestants, including Miss Bernaby, who was picked to repeat her effort of last year. Miss Bernaby failed largely because of slow mowing time the quality of her work being good.

Second Prize Second Prize

Second prize in the contest was awarded to A. E. Strand of Pembroke, while third prize went to Elwin N. Flanders of Warner, N. H. Mr. Flanders was the champion of Mr. Flanders was the champion of Hillsboro County and was considered as the "dark horse" of the contest The prizes were, \$15 for first prize \$10 for second prize and \$5 for third

Thompson of Stratham, 87, the dest contestant entered in the contest. George Corson of Durham re ceived a prize of \$5 for being the second oldest. It was estimated that approximately 700 people attended

The pageant was produced on the of University Pond with a shore of University Pond with a cast of about 50 people. Among its scenes was a picture of the hardships of the old-time pioneer in clearing land, building homes, fighting off wild beasts and learning how to grow the right crops on the locality. Later on a scene was presented showing the introduction of the cast-tron plow and the moving machine. The outstanding thought of the pageant was that there is a necessity for pioneers today to meet the new conditions which face the modern farmers in their problem of earning a living.

Struction and Research and alley between Mt. Auburn and Brattle Streets in Cambridge has been transformed this summer into an exclusive residential community for married graduate students and young instructors of Harvard University. This completes the Shaler Lane development, which will house more than 60 families this fall.

The Harvard Housing Trust, an organization sponsored by Harvard alumin, more than a year ago underfook the problem of providing suitable homes for the 400 married men

the Carroll County

Austin, Tex., though far from his best play, held the veteran internationalist. Watson M. Washburn, by his steadiness, and won at 6-3, 5-7, 6-4. Washburn outscored the Texan on earned points by a wide margin, but was unable to refrain from errors in handling the hard drives and voileys of White, and his errors were responsible for the loss of the match.

Manuel Alonso balanced matters in the second match when he defeated John F. Hennessy in another three set match, 6-2, 7-3, 6-2. Hennessy won the first two games of the match that the brilliant Spaniard ran through the next six after hard-fought deuce contests in three of them and led at 5-4 in the next, but Hennessy launched a strong attack on the service of Alonso in the next game, winning a love game and finally managed to take the set in the sixteenth game on another break. But this service was not equal to the attack of Alonso in the final set, and only twice was heable to win on it, making the final score, 6-2.

Then Clarence J. Griffin balanced the doubles victory of the East by swamping young Frank X. Shields, national junior champion, with a dering a variety of soft shots that had Shields helpless to handle them. The latter was also below his best form, especially in service, and though he fought hard, holding off defeat four mere matches will be staged today, with the encounter between Hunter and Lott scheduled for five nore matches will be staged today, with the encounter between Hunter and Lott scheduled for five nore matches will be staged today, with the encounter between Hunter and Lott scheduled for five nore matches will be staged today, with the encounter between Hunter and Lott scheduled for five nore matches will be staged today, with the encounter between Hunter and Lott scheduled for five nore matches will be staged today, with the encounter between Hunter and Lott scheduled for five nore matches will be staged today, with the encounter between Hunter and Lott scheduled for five nore matches will be staged today.

LARGEST FIELD IN SEVEN YEARS TO PLAY FOR AMATEUR TITLE

Nearly 75 Per Cent of the 168 Entries Have Played the Course to Get the "Feel" of the Fair-

ways and Greens

MINNEAPOLIS, Minn., Aug. 20 (49)

—Amateur golfdom's most imposing array of experts—the largest field in seven years—will contest for the United States amateur championship here next week over the picturesque Minikahda course.

While Von Elm in earlier rounds kept on friendly terms with par.

Jones appeared to find little cheer yesterday in a par 33 for outgoing nine and a later 34 for the same holes, for the only 13-hole round he completed brought his total to 73, one were par, and this, he held, was not good enough.

securely on top. Lloyd was the first National Leaguer to reach the 100 mark in runs.

Frisch is making another threat at third place, being only 2 points behind Barnhart, the lowest of the Pittsburgh trio.

The hero of last fall's World Series, Grover C. Alexander, who was sold by the Cubs to the Cardinals for the waiver price, is proving that his efforts in landing the world's championship flag for St. Louis were not the final flash of form. He is within the first five of the National League, in averages compiled today, including Wednesday's garnes.

Alexander has won 16 and lost 7 this year for the Cardinals and only two pitchers top him in victories, Haines of the Cardinals, with 19 wins is one of these and Root of the Cubs is the other, with 22.

Williams' home-run bat has been idle at the 22 mark for a fortnight, and meanwhile Hornsby and L. R. Wilson of Chicago have climbed up to 26.

Frisch, while waiting for one of the cardinals for one of the part of the cardinals and L. R. Wilson of Chicago have climbed up to 26.

# ANTIQUES for the HOME MAKER and the COLLECTOR

## A Colonial Merchant's Home

By CARL GREENLEAF BEEDE

has survived the political and economic changes since that date, and now is open daily for public enjoyment as the home of the Marblehead Historical Society.

In 1907, 139 years after its erection, this building, which is one of the best existing examples of colonial architecture, was sold under the auctioneer's hammer for \$3500 Prompt action on the part of a group of alert and public-spirited citizens rescued this beautiful structure from the impending fate which ture from the impending fate which

threatened to despoil its interior by the removal of its choice architec-tural details. Now it is the object of loving and intelligent care, housing several thousand objects of historic A Surprising Coincidence

As it was 139 years after the Lee fansion was built that the movement for its purchase began, by strange lence it was exactly the same ength of time before its construction that the first settler came to the rocky land about this harbor. The slow growth of the community thus started on a shore which offered but slight possibilities for farmers, depended naturally at first on their bility as fishermen. Later, as the backbone of a fleet of merchant ships, profitably engaged in following all the then known trade routes of the

From this deep harbor, overlooked Jewelry in the many by rugged hills, sailed scores of swift merchantmen, owned by farmany cases stood on its waterside hills. From their windows they could watch the departure and arrival of their splendid craft, a single cargo of which often represented a goodly

Many names were prominent in this activity which we now look on, as the romance of the seas. The leader of these was Col. Jeremiah Lee, who at the height of his prosperity erected this imposing residence, in many ways one of the most interesting in the American colonies. Colonel Lee was more than a great merchant. He was a fearless patriot, friend and associate of John Hancock, Samuel Adams and other leaders in the colonists' stand for right as they saw it.

Its Days of Decline and Danger Its Days of Beeline and Danger
The hospitable doors and the
stately rooms of this home welcomed
many prominent guests. Washington
was entertained here at lunch on his
visit to the town in 1781 and Lafayette stayed here in 1784. In 1804 it
passed into the possession of the
Marblehead Bank, by whom the first floor rooms were used for over a century for banking purposes, for-tunately with only the slightest

of changes in any detail.

'Thus rapidly sketched is the story of the Col. Jeremiah Lee Mansion of Marblehead, splendid relic of colonial days, a priceless heritage in archi-

Deeply grateful as we are that this building has been preserved for us, perhaps we should not allow our-selves to regret that it now holds nothing personally associated with iel and Mrs. Lee, except of her fans. We get a suggestion of the richness and dignity of the furniture which it once contained through a hotograph of several pieces that are now in the possession of a lineal descendant. This shows a set of mahogany side and arm-chairs with claw-and-ball feet and broad backs with pierced splat. A settee belongs to the same set and a serpentine front bureau is of the same style.

Looking at the Interior

to account for the consistent har- Marblehead residents in the public

Dignity and Lack of Noise

The absolute quiet of the room was decidedly impressive. Save for the shifting of feet as the afternoon only \$27. wore on there was but little other sound from the large number of peocountless English derbies a familiar

American straw hat could be seen:
The dignity, quietness, and speed
with which the auction proceeded made a decidedly favorable impres-sion. In a little over three hours 200 objects were shown, bid upon, and the sales recorded. An auction at Christie's begins exactly on the mo-ment advertised, and much time is saved by the fact that catalogues may be obtained in advance and the objects viewed on the two days pre-

\$1200 for 49 Toby Jugs

As a barometer of demand, and consequently of prices, Christie holds undisputed lead. There are no with panels of looking-glass, a As a barometer of demand, and sales at the rooms during August, sloping center forming secretary, and six drawers below, brought \$250. A beautiful little cabinet, 28 the last sale of the season, was held inches high and 24 wide, entirely July 28. The highest price received overlaid with tortoise shell and infor any one article was 540 guiness, laid with birds and flowers in en-

July 28. The highest price received for any one article was \$40 guineas, a little over \$1200 in American money, paid for a collection of 48 Staffordshire Toby jugs of various models.

Five hundred and eleven dollars was paid for a Sheraton mahogany cabinet with glazed doors in the upper part; a drawer in the center forming secretary; four small drawers at the sides and three below, the borders banded and inlaid with satinwood lines.

The growing demand for French furniture was evidenced by the interest shown and the prices realized. Three Louis XV gilt fauteuils slightly carved with flowers, the seats and backs stuffed and covered with flowered cream silk brocade, sold for \$122. flowered cream silk brocade, sold for \$132. A settee, two armchairs, and two side chairs with gilt framework and covered with Auduson tapestry brought \$300, despite the fact that one leg dropped off from the settee as it was lifted up in sight. These of course are English prices, which are lower than those in America, due to

eavy boxing and freight charges.
Tall Clocks Seem Cheap at \$200 More interest was apparent in the bidding on clocks than in anything else, although the prices realized were perhaps not so good. A tall mahogany chiming clock, made by James Nicoll, Edinburgh, with brass dial showing calendar and celestial movements, the top carved with a thistle, brought a little over \$200. The same price was given for another tall clock, this by Klaften-

A Chinese Table

R ECENT disturbances in China have apparently have apparently made little difference in the general interest in all kinds of Celestial furnishings and objets d'art. Antique lacquer, carved or painted, carved ivory and jade statuettes, Ming porcelain and Chinese silks—these re-tain their attraction, even though the centuries-old civilization which

produced them should wholly change in its standards.

One of the charms of Chinese chairs and tables is to be found in their combination of rectangular elevation and plan with a system of decoration which breaks up the outlines into graceful, fluent curves.
Notwithstanding their artistic mer-

its, Chinese chairs are uncomfortable unless plentifully padded with loose cushions, and Chinese tables are frequently an inconvenient height. This is owing to the fact that, except where western influence prevails, chairs and tables are not in general use in China; they are intended, not for comfort, but for state and formal occasions. The joss table, designed for the purposes of ceremonial reli-

It can be very decorative as an occasional or side table, and may be used for the display of Oriental porelain, or flowers.

A Chinese table recently a convenient height for western use, though the extreme beauty and delicacy of the inley make it a decorative piece of furniture. A Chinese table recently seen is of wholly decorative piece of furniture. It is a rare example, dating from the early eighteenth century; and it is seen in an appropriate classical environment. Mother-of-pearl and ivory, delicately engraved with the veining of foliage and flowers, are used for the inlay, the pattern of so-called Greek fret.

Chinese tables and chairs are sometimes to be had in carved lacquer. Probably the most wonderful example of this kind is the throne of Kien Lung (eighteenth century) in red lacquer with undercoats of yellow and green partially exposed by carving down to them, so those colors play their part in pattern and a clumsy manner, as is usually the case, not only is the surface lost. but the delicate curves of the turnings give place to distortions that seen in the Victoria and Albert Mu-seum, London.

# Music News of the World

## The Pursuit of the "Wrong Note"

BY EMILE VUILLERMOZ

Paris, Aug. 1

VERY time that a composer has taken the technique of his time one step forward by discovering new dissonance he has been showered with insults by the great one good deed of the "false note." majority of his contemporaries, who immediately accuse him of practicing the snobbery of the "wrong note."

This reproach has been hurled successively at every musician with a particle of originality. Do you remember that George Bizet was regarded as an obscure and incomprehensible Wagnerian, an apostle of cacophony and specialist in harrowing harmonies? In these circumstances it is not surprising that Debussy, Ravel and Stravinsky have aroused the same objections. For the young never profit from the experigarded as an obscure and incomprehensible Wagnerian, an apostle of cacophony and specialist in harrowing harmonies? In these circumstances it is not surprising that Debussy, Ravel and Stravinsky have aroused the same objections. For the young never profit from the experiences of their elders.

ences of their elders.

Is it, however, very difficult to believe that the pursuit of dissonance is
at the very root of musical enjoyment? Composers of genius are
aware, before their hearers, what
clash of notes or mixture of vibrations will procure a new stimulus to clash of notes or mixture of vibra-tions will procure a new stimulus to the attention. The unlearned masses first of all protest, refuse to find any pleasure in these unknown effects; then, little by little, grow accustomed to these innovations, find them at length less aggressive, then tolerable, and finally eloquent and pathetic.

New Languages But the lesson of the centuries has not taught music lovers to be patient and to put their trust in great artists. words or coins that have been in circulation too long. The first appearance of the "dominant seventh" must have given tremendous novelty to the ars of musicians, whereas it is quite to us no more daring than a common chord. It is the same with the augmented fifths of Wagner, the ninths of Massenet or the seconds of De-

Without making the mistake of supposing the genius of an author to rest in these single technical proc-esses, it must be recognized that an artist has an interest in a new language when he wishes to express new thoughts. He thus makes them more striking and more persuasive. The pursuit of dissonance is not then an arbitrary experiment nor a ca-price of anobbery, as amateurs whose oral laziness is ill-adapted to these daring explorations try to insinuate.

An Incessant Search

See what happens in musical countries where prophets and pre-cursors are not particularly honored. To prevent the public from tiring of the terms of the current musical language, the search for the little, unexpected effect which will reawaken the attention that is threat-ened with drowsiness is incessant. By the most divergent paths, one tends always toward the same ob-jective: to produce the tiny shock of

An absolutely true sound from the acoustic point of view does not al-ways provide favorable raw material or the designs of musical architects. piano too perfectly tuned would an insipid instrument. If the three strings hit by the hammer could be stretched with mathemati-cal precision, the note produced would be singularly cold, flat and inexpressive. The tuners know this and never fail to allow a slight looseness" to subsist between the steel threads, to cause between the

The "Vox Humana"

But that is not all; organ makers, to please the most timid clientèle. know that they must not trust to mathematical exactitude. It is not to shock but to charm the most unsophisticated ears that they invented the "vox humana," which is only a voluntarily out of tune stop. It is the friction of the vibrations placed in antagonism that gives this very chroniclers. The architectural, sculp-particular timbre its bright tremolo tural stage of "The Cat" has already and its intimate emotion which as-sures it an expression sometimes distinguished, always very taking. Since the cinema has popularized

has been devoted to church purpos this technique has been pushed to ferent levels and use of factory and its last limits. Here, again, the machine forms as symbols of an inwrong or false note triumphs.

Moreover, the tremolo of the haronium or the vibrato of the violin-

ist, which disturbs the normal bal-ance of a sound and makes it bite softly onto the neighboring notes is nothing other than an effect of charm obtained by the false note. The vogue that for some time has

existed for all muted effects in wind instruments has no other explanation. The voice of the muted trum-pet, suddenly broken and as it were eracked, bound in the bell, immediately becomes much more moving when it is bursting with vigor. Unwittingly, it is always toward the donary composers tend, in pursuing vibrations of this kind.

Use of Two Pianos

One of the most characteristic of the present hour is undoubtedly the coupling of two pianos. Of course cores for two keyboards have been written for a long time. In arrange-ments of rather complex scores this process renders the greatest service. But, for some time past, it is in a different form and with a different object that the superposition of the two instruments has been

It is from America that this precious indication has come to us. Certain jazz records have taught us the delights of a song-foxtrot accompanied by two planes. Vountarily or not, the two planists and the two ets of strings are not exactly super-posable. The "loosening" of which we spoke gives to all the chords

Cycles of dissonance in writing develop century by century, in the strict order of harmonic sounds. Without being aware of it, composers add them one after the other, following the inevitable progression; which is an excellent argument in favor of the legitimacy of these conquests which people too often try to represent as disorderly fantasies. But the cycle is not unlimited. A time will come—and some people think we are bordering on it—when it will be necessary to stop this it will be necessary to stop this abysmal course. On that day composers will have to seek elsewhere the "vibrio" which enliven their vocabulary that unceasingly threatened with decay. Do you not think that it is in the instrumental field that curiosity may be exercised most fruitfully? Are not the examples we have just given characteristic? When all the fluid vibrations of harmonies all the fluid vibrations of harmonies have been used up it is probable that new effects will be demanded from instrumental timbres. Let the future tell us in what form men of tomorrow

## The Complements of the Season

By W. H. HADDON SQUIRE

solemn and expensive ritual of grand opera at Covent Garden, but with the coruscations of Diaghilen's and to put their trust in great artists.

Musical appreciation has need of with the coruscations of Diaghileff's perpetual renewing. Every style ends by losing its original freshness through the inevitable wear and tear of its vocabulary. The sharp edge of chords grows blunt like that of corons or coins that hear hear in circuit, cert of his own compositions includcert of his own compositions, includ-ing the new concerto for harpsichord or piano; Ravel came over to hear all his piano works played; Stravin-sky's "The Tale of the Soldier" was performed at the Arts Theater Club; Stravinsky appeared in person to conduct his "Mayra" Overture, his suite for small orchestra and a reorchestrated version of "The Fire-

pleasure of instrumental dissonance

He was also on the same occasion the soloist of the first English performance of his concerto for plano-forte with accompaniment of wind instruments. This concert was arranged by the British Broadcasting Company and radiocast on a Sunday afternoon, when perhaps it was presumed that most of the philistines would be taking a nap, or as Dr. Johnson put it, the nap would be

Stravinsky Conducts

At the Stravinsky night given by the Russian Ballet the composer con-ducted "Petrouskha, "Pulcinella" and "The Fire-Bird." And Diaghileff has not only given us a new version of Stravinsky's "Nightingale" and ballets by Debussy, Auric, Poulenc, de Falla, Lord Berners and Constant Lambert, but also new productions by Satie ("Mercury"), Sauguet ("The Cat") and Prokofief ("Le pas d'Acier"). Could the listener in search of musical adventure ask for

more?
"The Cat" and "Le pas d'Acier" both captured the London public. "Mercury" made its second appearance only during the last week of the season when—yet once more—the applause of the audience supplied a somewhat ironic commentary on the press criticisms of the first per-formance. What, one wonders, will the future historian, poring over old twentieth century newspaper files in the British Museum think of the criticism directed against the ancient wibrations of harmonic sounds an imperceptible friction which gives them lightness and brilliance. This, whether one likes it or not, is already a methodical and, if one may say so, an "industrial" pursuit of the famous "wrong note" introduced in its embryonic state, in the working instrument of the most timid music refused to alter their clocks to sum-mer time, and men who would not use telephones or motorcars. Some hasty annalist—historians are a rash race—may conclude that these writers of much of the musical criticism of their time.

The Constructionist Stage Meanwhile Diaghileff is still mak-ing art history of a much better kind than that manufactured by the tural stage of "The Cat" has already been described in these columns. In "Le Pas d'Acier," the constructions and costumes of which are after de-signs by Georges Iakouloff, London this instrument which, up till now, got its first glimpse of Meierhold's has been devoted to church purposes, constructionist stage, with its difthis technique has been pushed to

> dustrial civilization The two tableaux of this ballet, said the program, present a series of scenes in which are summarized two aspects of Russian life: the stories and legends of the countryside, and and legends of the countryside, and the mechanism of the factories. The stage designer must possess, to bor-row the apt words of Roger Fry, the "power of using form and color with a double meaning first as pure de-sign, and secondly as a means of sign, and secondry as a means of evoking vague suggestions and flavors of time and place." This aim is happily fulfilled by the construc-tions and costumes of "Le Pas d'Acier." The "punch" of the noisiest

Let us then cease to cultivate ready-made formulas. Dissonance plays a big part in music. Indeed it is the most important element. Music devoid of dissonance would lose all existence.

HIS summer the London musi-cal season ended, not with the blows of the final scene—the sledgehammers, one must add, are not only methaphorical but literal. Three dif-ferent stage levels carry up the rhythms of the dancers, which thus fill the proscenium frame, and move-ment and speed are intensified by whirling wheels and the oscillations of dazzling light and color. Choreography Admirable Massine's choreography is admira

available of comparing it with Meierhold's bio-mechanics, in which the mechanical theory is applied to acting, and Foregger's machine dances, which are built, Huntly Carter tells. us, "on the basis of the mechanical possibilities which are in the human body, taking as an example the move-ments of the machine." In Moscow, these machine rhythms have been ex ensively applied to jazz.

Sauguet's music to "The Cat" per-formed the modest function of providing a sort of innocuous musical where a selection of works seeming backcloth for a beautiful stage; in worthy of attention was made known "Le Pas d'Acier" Prokofieff shows to the public. At the first of these that musically he is not in the least intimidated by sledge-hammers. This It was then that he became acquired the stage of field itself to music. The music of "Le Pas d'Acier" is bright, metallic, well-constructed stuff that moves one almost said "works"—with the thrust and dynamism of an engine. After a time the listener begins to imagine that he can smell hot metal, "Mercury" transports us to another

and very different world. These "Poses Plastiques" with music by and very different world. These

And though the proprietors, done for the Baden-Baden Festival. Soirées de Paris organized by Comte Etienne de Beaumont.

The Journey to Greece Cocteau once told us that his jour-ney to Greece "was made at Mont-parnasse, later at Montrouge, and now in the Rue la Boetie." Satie, Picasso and Massine conduct us on the same journey by an even stranger Cerberus, Proserpine and Pluto, before scholars and the authors of classical dictionaries had dimmed the glory that was Greece. No sooner are we there than we discover some-thing that a few of us had always suspected: these gods and goddesses had a well-developed sense of humor. Picasso shows how they and their extremely simple or rather simplified surroundings looked. Massine their singular Terpsichorean habits, and Satle, the Socratic, enables us to the rest of the world sounds as if it

came from Arcueil-Cachan, a suburb of Paris. Comedians return to London from the north of England with grim stories of stiff-faced men who, as they sit down in the front row, are heard muttering defiantly, "Now make me laugh!" Musical humorists have no need to go to the north of England for this embarrassing invitation and its R. S. V. P. But for those who appreciate the Satie savor "Mercury" is full of delightful whimsicalities. Evidently there is one god with a voice like a tuba, the instrument for which Satie entertained. ment for which Satie entertained at almost inordinate affection. Its frequent use reminded one of a description of Satie's orchestra that is no likely to be excelled. It came from the pen of his greatest admirer "Erik Satie's orchestra," wrote Jean Cocteau, "charms without the use of pedals. It is like an inspired village

## The Baden-Baden Festival

By ADOLF WEISSMANN
Baden-Baden, July 31
BADEN-BADEN has become the musical heir to Donaueschingen. This small town, which lies in the Black Forest, acquired after the war a notoriety that no body could have expected in former times. One day Prince Egon of Fuerstenberg made up his mind to support young German composers in the best possible way, i.e., by the performance of their works. So every summer musicians and music round the best possible way, i.e., by the performance of their works. So every summer musicians and music contributed a good deal to making him famous, he remained lovers gathered in Donaueschingen, as the lovers gathered in Donaueschingen, as the landscape.

Everybody knows that the fame of Germany which has followed good old tradition in a kind of community singing, with musical material by himself that is outhwestern corner of Germany which plays a very important part in German musical culture. It was here that Hindemith's Quartet in C major was played for the first time. And though the festivals of the Inventorial part of the stream of the ducation by providing the so-called "Musikanten gilde," which has followed good old tradition in a kind of community singing, with musical material by himself that is outhwestern corner of Germany which plays a very important part in German musical culture. It was here that Hindemith's Quartet in C major was played for the first time. And though the festivals of the Inventorial part of the support lovers gathered in Donaueschingen, latter did to him. He may even be

they have been transferred to Baden-Baden, he fills the same functions on

Hindemith, who no doubt is the most gifted of all contemporary German composers, and who represents, in a certain sense, the young generation.

has become so solicitous for popularity that a good part of his energy is lost in what he considers his principal task. His facility in writing

music can hardly be surpassed. It is his mistake to make a rather too abundant use of it. He is the viola

player in the Amar Quartet; he writes music for the mechanical or-

parodistic operetta. All these he has done for the Baden-Baden Festival. But it is not enough. For besides, he

takes an active part in young Ger-

disciple of Stravinsky would without quainted with young Paul Hinde-hesitation set a steel-works or Shef-mith, whom he declared gifted enough to dispense with extreme modernism.

The Donaueschingen went on till 1926, when Prince Egon of Fuerstenberg found it was time to leave the function of furthering modern music to other people. So Hein-rich Burkard, the musical leader of that institution, had to look for new of the big hotels were not quite of the same opinion, the town of Baden-Baden declared itself ready to

promote modern music Baden-Baden Not Sultable

The first thing we observe is that Baden-Baden cannot replace Donaueschingen. If we take for granted route. The country itself, we find, is the influence of environment upon stranger still—it is the home of Mercury, Apollo and Venus, of Bacchus, that Baden-Baden, with its old repuplace on the point of being renewed is more suitable for sport, and so on, i. e., for all that has a more tangible value than music, which appeals only to a certain circle of connoisseurs who are considered by the good bourgeoisle of the town as curiosities to be exhibited in a

However different the feeling of the musician may be to that of the plain man in the street, he feels rather bewildered by the character of a fashionable watering place, thinking, not without regret, of the idyllic small town in the Black Forest,

WESSELL, NICKEL & GROSS Established 1874

It is rather amusing to see how differently modernity in music is re-flected in the works which form the programs of musical festivals. To vary the French proverb a little, one may say that "Tous les genres sont permis, même le genre ennuyeux." of the latter there is always a large number to be found, though of course dullness may be produced with less complicated means. On the other hand, tonality has gained so much ground that sometimes it is difficult to understand why music has gone through such phases as atonality and polytonality, if the result of all that is a simplicity easily to be obtained on the highroad of music. How few composers are modern by innate necessity, how many others only pretend to be so.

Discarding all that is superfluous and considering two chamber music works of such different characters as Bohuslaw Martinu's string quartet and a new lyrical suite by Alban Berg, we become more optimistic than when letting all these works pass one after the other before our

Martinu and Berg

Martinu, the Czech composer, some years ago, at one of the Prague festivals, struck the hearers by an orchestral composition called "Half-time," to which sport and Stravinsky had contributed the greater part. What we heard now was fresh and cleverly built music, written by one who does not fear to be reproached with conventionality. He is a de-cidedly modern musician, though wearing his modern clothes quite naturally. Amid some harmonies which we cannot but call modern, we met with some commonplaces which, however, are more promising than false originality.

Alban Berg is a man of quite another stamp. This pupil of a master is a master himself. His lyrical

the audience was deeply moved by it, the more so as the Vienness Quartet achieved in it the most extraordinary pieces of playing I ever heard. The shades of planissimo obtained here were really exceptional.

Béla Bartôk also came here to play a new sonata. I am sorry to say that this Hungarian composer, whom we appreciate so much, has fallen into a one-sidedness which may prove fatal to his future pro-

Strangely enough, German musi

cians strive to prove to us that music written for a mechanical apparatus may have artistic value, if the com-poser himself is an artist. So Paul Hindemith, as I said before, composes for a mechanical organ, as others do for the mechanical piano. Their compositions, being more quickly played and less emotionally conceived by the composers, move in a very narrow circle and are all alike. And as regards music for the film, I maintain that it is superfluous to accompany a good film with music, for the more attention you pay to the film, the more you will feel that nothing else than a rhythmic and that comic opera, in English, would dynamic musical parallelism is required to make the mute, though restless, motion on the screen convincing to the spectator who is a listener at the same time. As for the speaking or sounding films, shown on the same occasion, there is nobody who does not feel that they are likely to call forth unexpected changes in the future artistic world, but it is, for the moment, more necessary to give individually rendered music its due

Paredistic Operas

Let us mention, therefore, the oneact operas, which were written by four composers for the Baden-Baden festival. One of them was Darius Milhaud, the only foreign musician who took part in it.

Every now and then the problem whether or not opera has passed away arises before the astonished bourgeois, who finds it strange that there are people who want to de-prive him of one of his greatest pleasures. Even some young composers declare themselves ardent partisans of opera. But, alas, when they undertake to set a libretto to music, it becomes clear that their notion of opera is quite different from that of the bourgeois. They are ndeed much more sincere when they

joke about it. Who knew better than Stravinsky ter is a master himself. His lyrical suite, in six sections, is like a quintessence of "Wozzeck" translated into the language of chamber music. This musician always remains true to himself. And if we think him to be somewhat artificial, he will convince us the next moment that he expresses his innermost convictions in music. He cannot but remain in the Tristanian tradition. He goes so far as to proclaim his faith and his origin by a quotation from this work. But what has Tristan become here! None of those whose music goes back to the same source has ever arrived at the same results. There is in his new suite an allegro There is in his new suite an allegro the climax, to its starting point. The misterioso that may be termed a public enjoyed this original play complete immaterialization of sound, but one that is so expressive that

#### Cincinnati Opera

Cincinnati, Aug. 16 Special Correspondence. THE final week of the summer opera season at the Cincinnati Zoo was given over to light pera, when Isaac Van Grove, in conjunction with Ralph Errolle, tenor, produced for the entire week Balfe's "The Bohemian Girl." No production of this opera is likely at present to be of great artistic importance, but the response of the Cincinnati audience to it was watched with more than usual interest because raises an important question.

The success of the St. Louis Municipal Opera project in producing comic opera and musical comedy has led to widespread discussion of the feasibility and desirability of inau-gurating a similar repertoire in Cin-cinnati. Naturally, conservative music lovers, who wish to hold up the standard of Zoo opera productions, are inclined to oppose such a ven-ture, but there is, on the other hand, prove more remunerative than the present program, and appeal to a wider public.

Grand opera is seldom, if ever, a financial success, and Cincinnati's company is no exception to the rule. On the other hand, the quality of the productions has been for the last two years much higher than might have been expected in a summer organization, and many people are loth to part from the opportunity to enjoy the operatic literature. This group, indeed, would seem to be in the mafority, for during the last two years it has been the invariable rule that the more serious operas drew the larger crowds. No comic or even light opera has yet sold out the house, while the outstanding box office successes have been "Tannhäuser," "Lohengrin," "Carmen" and "Aida." "The Elixir of Love," "Falstaff," "Fra Diavolo" and "Barber of Seville" played to uniformly small audionces but it was need that the audiences, but it was urged that the foreign language element was an im-portant consideration. "Bohemian Girl," however, gave the opportunity to produce a light opera in English, in which also the element of unfamiliarity could play no part. Its re-

ception, therefore, was matter of in-terest in determining policy. So far, the results are inconclusive. It did not prove to be the box office magnet the German operas were, Who knew better than Stravinsky in his "Histoire d'un soldat" how to play upon the musical stage! Two of the four composers, Ernest Toch in his "Princess on the Pease," a musical tale, and Kurt Weill in "Mahoganany," a ballad opera, had indeed any," a ballad opera, had indeed taken the best of their material from than the other operas, and that is an extensive well. item to be taken into consideration But on its own merits as an operatic attraction it fails to make a case for

light opera in Cincinnati. The production itself was quite meritorious. Ralph Errolle gave a distinguished reading of the rôle of Thaddeus, while Herbert Gould and Charles Galagher made sound con-

of seventy summers grew curious as only ladies, and they say cats, can grow—However, I must begin at the about him, they always ask so many curious if I am totall you

Fe, and peep into the window of a low adobe house which seems to be, as indeed it is, a part of the hillside itself. You will find yourself looking into a room of rather primitive inspected by the property of the property fluences. Walls two feet thick neces- lock Holmes-wise were put together sitate wide casements and give the effect of having been built to keep but wild winds and arrows of manuding Indians. Heavy hand-hewn imbers, "Vigas" the Mexicans cali other to get through their narrow hem, hold up the ceiling and form chimney out into a speckled dark-anyons where the light from the fire plays hide and seek. The fire-place is low and, Mexican fashion, heard signs upon the ground. In one sense that these ladies learned of S. was as fragmentary as the concept one might have of a neighbor whose shadow only is glimpsed at night through heavily draned with at night through heavily draped win-dows; yet in another sense they had an idea of him as an individual such an idea of him as an individual such as some perhaps who speak to him daily might not have. Here they had his ancestor, the sturdy man of Devon who herded sheep; here they had his childhood—"Born and bred in that wide country of the corn which is watered by the Mississippi"; here they had a hint of his travels; here they met his friends and became acquainted with his tastes in literature.

They had accepted him as a friend, congenial, approachable, somewhat

They had accepted him as a friend, congenial, approachable, somewhat like themselves, fond of music and of a book by the fireside evenings, when one day they found in the paper a review of a book on the poetry of Bliss Carman, by O—S—, and the reviewer called him Professor. The ladies tried to deny it. Their O. S. could not be a university professors that would make him remote

profered. Phough they have spent many a congenial hour with him, these ladies never expect to clasp hands with O. S. nor hear the sound his eyes the quiet canyon brooks and pools, the solitude of the high Sierend and the Lady Rain's soft touch.

They have explored with him Sunshine House and reveled in its charm, as well as the hermit's cabin.

Charm, as well as the hermit's cabin. to know of a friend? They even have artist has done the fullest justice to come to enjoy a sort of vicarious authorship in his work, which is per-

haps better than no authorship at all.
It would be only fair to say that original intentions of the builder. these two ladies sometimes wonder Mr. Macnab has tackled his subject if the O. S. they have pieced together is actually an individual or merely work is both attractive and effective, the product of accumulation like the sentence to which each one adds a the window all awry well repay a clause not knowing what has been close scrutiny—the house altogether written before. The suspicion will stands out in plastic strength, the come that only a fertile imagination impression being further enhanced and a gift for armchair travel could account for the mixture of sea. mountain, moor, and wide corn country which seems to be O. S. For all they know those initials may stand for Office Staff!

After all, it matters not what the answer to that question may be. If like the above. O. S. is able to lift one's thoughts away from dishwashing for a mo-ment to the song of the hermit thrush, or from the depleted state of the check book to the peace that lies on the Devonshire hills, that is enough. If he has brought the emer-ald pool to those dwelling in the desert, if he has rung the steeple chimes for some who delly machinery, or if he is able to bring the warm splendor of the tropical sunrise to thought on a winter's day, then he has a right to his nom-de-plume and his armchair travels here, there, and everywhere.

Travel far, O. S., and bring back

precious cargo of rhythm and color to those who stay at home. Yours truly, H. K. H. G.

Flowers Native and Free

This much of gardens; but I tell Also of native flowers in wood and dell;
Not such as, sudden, on a stony height,
Break from the warmth of snow and live in light
Of thountain sun on Alp or Dolomite, Bright squabs on limestone screes: Not of the Rhoetian poppy, fluttering brave Frail yellow flags beside a rocky track Alone with eagles; not of these, Not of the thymes that greenly pave A fallen cliff, rock-rose in cruel crack; Not of the scarlet tulip, slim and bright, Snapped by the gallop of the wild gazelle; But of such flowers as dwell In marsh and meadow, wayside, wood and waste,
Of campion and the little pimpernel;
Of kexen parsley and the varied vetch; Of the living mesh, cats-cradle in a ditch; Of gorse and broom and whins; Of hops and buckwheat and the wild woodbine That with their stems must twine Like the way of the sun from left to right; Of berried bindweeds, twisting widdershins; Of all the tangle of the hedgerow, laced With thorny dog-rose and the deadly dwale;

Throughout the season do I count their tale, But orderly, that those who walk abroad In lane and wood May find them in their season as they grow; Anemones like some last drift of snow
Between the hazels, hanging down their bell
When rain's about; small woodruff low;
Bugles, that leave the shelter of the glade
And march across the open; violets that blow
Purple and dim at tree's-foot; and the tall Orchis that country children call By many names, some pretty and some rude. These are the flowers that shelter in the wood, Sulky in colour, as secret in the shade; But wayside tramps, saucy and unafraid, Jack-by-the-hedge, Pickpocket, Ragged Robin, Pushing their way with spring, when helfers range Uneasy up the lane, and as they go Tug at a passing mouthful, biting harsh. And others in the meadow and the marsh Make rings round Easter; kingcup, marigold, And the pale orchis dappled like a dobbin; Buttercups thousand-fold Wearing their cloth of gold among the hay With clover and the little eve-of-day.

V. SACKVILLE-WEST, in "The Land."

#### The Newborough Market

The market hall was a handsome stone building with a high glass roof, that multiplied every sound beneath it. Here rusticity, as opposed to the cosmopolitanism of the sailors, ran riot. Under the hard light, which fell through the roof as through a slab of ice, a stranger would be speedily detected, and gimletted through and through by the keen steel eyes of the country-

The stalls were arranged in four or five rows, running back to back own the length of this rectangular building. And hither, once every week, came the country women, from distant moor, hill or dale. To reach in good time this stone temple t was necessary for them to leave their farmsteads at four or five o'clock on a bleak, black morning. road in carts that, like cornucopia, overflowed with the stored autumn riches of the countryside. For many dark mile they jolted on, until th gray light began to creep up, and, leaden though it was, sufficed to kindle the inflammable red lanterns of hip and haw, and a hundred other berries that now glowed warmly among the cobweb-tangled and rimy twigs of hedge and thicket. The flat lines of stone walls alternated with these hedges, and repeated the rhythm given out by the terminable perspective of gray thaw-ing. But before this grayness of the North, which sheds a light that never favors unduly even the most sparkling object, but distributes impartially its realistic effects over things dull and brilliant, had done justice to everything it touched, the riches of the carts. There were countless pyramids of russet apples, polished till their shining red convexities reflected, though distorting, these expressionless discs in a thousand different ways, the similar high coloured circles that formed the

Here may you have such
things
As women much desire:

Here may you have of sundry

Such songs as you require.
Wherefore, my friend, if you regard
Such songs to read or hear,
Doubt not to buy this pretty Book, The price is not so dear.

From "A Handful of Pleasant D lights" (1584),

high solid stone steps which lead to typical American audiences, those deits upper part. The old man in the picting ditte ordinary scenes of cheer picture is a true son of this alluring ful family doings. One might, with pools, the solitude of the high Sierras. They have heard with him the song of the hermit thrush and the speech of the steeple bells in some English village. They have shared his joy in the long journey's end and the Lady Rain's soft touch. They have explored with him Sunshine House and reveled in its sion in the picture, with his broad
some excuse, accuse the characters of being too prosalc. However that may be, they are undoubtedly true to nature, and though sometimes the acting is a bit realistic or a bit drab, there is always enough comedy interspersed to enliven any monotony; also, the actors are never lacking in anthusiasm.

Written for The Christian Science Monitor in anthusiasm.

In one particular at least these continuous performances are unique: all the adult male actors have remarkable singing voices, and many a love scene that verges on the ridiculous escapes any imputation of ludicrousness when arias of unforced tenderness and beauty of tone are thrown in with the evident purpose.

Where the old mili Stands.

We wear high boots When we go to the Botto And we wear wide hats or slat sunbonnets. The briers are thick; And the sun is hot: thrown in with the evident purpose of covering over any weak spots in the action. Sometimes, it must be confessed, these arias are of such frequent occurrence, and are so lengthy, that the play is apt to be-

come comic opera.

The "mise en scene" is not much
more elaborate than in Shakespeare's time and remains practically

DURANT EXPECTS GOOD STOCKS WILL GO STILL HIGHER

NEW YORK, Aug. 20—Sailing for a vacation abroad, W. C. Durant said: "I notice that the common stock of General Motors is being, split up. If, as I understand it, the object is to secure wider distribution and to give the public an opportunity to purchase stock of this wonderful company at reasonable prices, it will probably be necessary to make another spirt-up in the near future.

"Speaking of the securities market, in my opinion good securities with emphasis upon the 'good,' will sell higher than ever before in the history of the country. Money is so plentiful it is almost a drug on the market, with the prospect that in the very near future the present rate for time money will-be considerably reduced.

"While many students and specialists will differ with me. I believe we are drifting into a so-called buil market, unprecedented in magnitude, which will extend over a period of many years to come."

NEW YORK. Aug. 20 (49)—Stock prices continued to work upward in joday's stock market but the advance was by no means unform. Pools were ugain active in a number of specialities but they had difficulty in attracting an outside following. Absence if many traders for an extended week-end holiday was reflected in the claively small volume of trading.

Motors were again a feature. Mysler crossed 58 to a new peak on he announcment of new models, and Peneral Motors which sold ex-divisend yesterday, approximated the rear's record high. Hudson fluctuated rather erratically, owing to the uncertainty regarding the dividend action to be taken by directors after the close of the market. Yellow Truck saues were weak, the preferred falling four points.

Dupont soared more than 7 points, and Houston made up most of the ground lost yesterday. Rallroad equipments were in good demand in anticipation of large fall orders, but olis falled to respond to the reported efforts to curtail production in the West Texas field. Ralls were color-less. The closing was firm. Total sales approximated 650,000 shares. Foreign exchanges opened steady with demand sterling around \$4.85%, and French francs just below 3,92c.

Week-end profit-taking was in evidence in various sections of the bond market today. However, continued easy money and the want of competition from new offerings, of which there was an aggregate of less than \$50,000,000 this week, lent prices a firm undertone, and several of the high grade investment mortgages were again climbing gradually.

Realizing was most pronounced in the French and Italian groups. French Government 8s, Lyons 6s, and Italian 1s were all fractionally lower. Domestic convertible liens also inclined to heaviness. including the D 4s of the Erle, and Brooklyn Union Gas 5½s.

There were few advances of more than a small fraction. Buffalo, Roches. 56 2900 Baidwin ... 259% 2

Gas 5 1/8.

There were few advances of more than a small fraction. Buffalo, Rochester and Pittsburgh 4½s moved up a half, and smaller gains were recorded by Baltimore & Ohio (Southwestern) 5s, Pennsylvania 6s, and Bethlehem Steel 5 1/2s.

United States Government obligations received scant attention, but prices were steady.

Markets at a Glance

NEW YORK

Stocks: Firm; Chrysler at new high. Bonds: Steady; French issues sag on realizing.
Foreign exchanges: Steady; Portuguese rates at year's low.
Cotton: Steady; Bullish Government boll weey'll report.
Sugar! Holiday.

CHICAGO Wheat: Firm; better export demand. Corn: Higher; smaller receipts. Corn: Higher; st Cattle: Irregular. Hogs: Steady.

## WEEK'S REVIEW OF BUSINESS AND FINANCE

Labor Is Well Employed, Money Easy and Farmers' Buying Power Increased

Consumers have been drawing on trike.

Consumers have been drawing on the large supplies of coal that were uilt up in anticipation of the strike, and it is predicted that they will be orced to come into the market soon or renew their stocks. Then, too, the rop movement when it gets under any should in part offset the present ecline in loadings.

Record Half-Year Traffic

Freight traffic for the first six

decline in loadings.

Record Half-Year Trame

Freight traffic for the first six months was the greatest on record, ing year by 5 per cent so that a good ling year by 5 per cent so that a good ling year by 5 per cent so that a good ling the year's total well up to that of 1926. Some improvement is noted los first the year's total well up to that of 1926. Some improvement is noted los first the year's total well up to that of 1926. # THE CHRISTIAN SCIENCE MONITOR, BOSTON, SATURDAY, AS STOCK MARKET RANGE POR E WEEK ENDED SATURDAY, AUGUST 20 Price Primer at Change on Earlie Control of the Change of the NEW YORK STOCK MARKET RANGE FOR THE WEEK ENDED SATURDAY, AUGUST 20

BULLISH NEWS

FALL RIVER CLOTH PRICES RISE BUT TRADING IS LIGHT

FALL RIVER, Mass., Aug. 20 (Special)—Further advances were registered on cloth prices in the local market this week, but sales were of relatively small volume, the total being estimated at less than 75,000 pfeces. Orders have been small, but have embraced a wide variety of constructions. The mills have no great accumulation of goods on hand despite the small business, as they are to a large extent running on contracts placed several months ago.

Narrow goods and reverse twist sateens have been the best selfers. Plain sateens have slackened in demand since the recent advance to 11% of or the best makes of 4:37s, and 10% of for the 4:70s. The demandor narrow print cloth was chiefly on the 45%. If yards, at 43-16c; 54% of the 45%, and 21% on the 10% of the 4:70s. The demandor narrow print cloth was chiefly on the 4:75s, at 5% c. Sales of 25.1m., 40244 5:56, at 6.2m. The local fine goods mills are enjoying a very good trade volume, but very little new business has been signed in the last few weeks.

Standard goods are today quoted as follows: 38%-im., 64x60s, 8%c; 39-im., 56x52s, 5%c, and 25-in., 56x54s, 6%c; 27-im., 56x52s, 6%c, and 25-in., 56x54s, 14%c.

Corn scored a big rally and held a good share of it. In some sections corn has improved but there is a tremendous acreage that will need a very late and favorable fail to mature. This being the case there is a gradual marketings. Argentine corn has been shipped in tremendous volume, more than double the amount of last year. This probably means less pressure later on, and is significant, moreover, in demonstrating there is a great demand for feedstuffs abroad. Oats have been a little singgish while rye has been firmer with good commission-house buying.

Public Service in 15 States rom a small beginning in 1852, the Associated Gas & ctric System has grown until now it serves over 560,000 tomers. Of these, 337,843 are electric customers. 77% the net earnings of the Associated System are from the of electric current.

Associated System

Over 159,000 customers are served in New York State, 36,000 in New England, 58,000 in Kentucky, Tennessee and Indiana, 21,000 in Ohio, and 116,000 in Pennsylvania. The public service activities of the Associated System ex-and throughout 1,000 communities having 2,700,000 popula-

would compare with business of \$4,785,394 in 1926 and \$3,339,033 in 1925.

## EARTH EFFECT ON RADIO MAY CAUSE FADING

Research by Carnegie Institution Points to Interesting New Theories

Terrestrial magnetism as a possible cause of the fading of radio signals and the resistence of the ground to the flow of electricity as a reason for unfavorable reception of programs from some radiocasting stations are two interesting theories advanced by O. H. Gish of the Car-negis Institution of Washington. Pre-liminary invasting the control of the carliminary investigations undertaken by this scientific laboratory under the general heading, "Possible Rela-tions Between Earth-Currents Earth-Resistivity, and Some Radio Phenena," have been so promising of fruitful results as to warrant a con-tinuation of the studies. Radiocast listeners who are sub-

jected to the exasperating experi-ence of the waning and waxing of signals while listening to a speech or musical concert would like to know whether or not "Mother Earth" is the offender due to earth-current anifestations occuring in conjunc tion with fading, as suggested by the Carnegie Institution of Washington Radio fans are likewise perplexed by the phenomenon of unfavorable re-ception in certain directions from some stations and even from all points of the compass with respect to a few transmitting stations. The probable explanation for this is that the ground at the surface of the earth sets up resistance to the flow of electricity; hence, the Carnegie Institu-tion proposes a "resistivity-survey," as applied to radio phenomena. "That certain aspects of the earth's electric currents and of radio phenomena may be related is sug-rested, both by theory and by

gested both by theory and by observational data," contends Mr. Gish, "although," he continues, "it is not to be expected that this relationship is one of cause and effect, yet it is likely a sufficiently intimate one to make profitable a intimate one to make profitable mparative study of these two sets

of phenomena.

"Before the development of radio,
"Before the development of in the the conception of a region in the upper atmosphere highly capable of conducting electricity was invoked as a necessary part of the mechanism giving rise to changes in earth-currents and the earth's magnetism. A rents and the earth's magnetism. A similar condition of high conductivity in about the same region of atmosphere is now also demanded by some features of radio transmission. It thus seems likely that the same conducting region affects both earth-currents and radio, and on that account certain consistent corre-spondences may be expected be-

"The data at present available for such comparison, though meager, in-dicate that the daily as well as the annual change in signal intensity for radio waves in the radiocast of frequencies is the reverse of the change occurring in the earth-cur-rent activity. These as well as other points of correspondence could be deduced from the correlations found by Dr. Greenleaf W. Pickard of Boston between the earth's magnetic activity and variations in signal strength, for it is well known that earth-currents and terrestrial magnetism are closely related. Further more, since good theoretical ground now exist for expecting terrestrial magnetism to directly affect radio transmission, perhaps producing such phenomena as fading, one may also find earth-current manifesta-

"Atmospherics or static, that well-known nuisance to the radio audiof his attention than it has thus far received. This phenomenon has an apparent counterpart in earth-cur-rents and makes itself most commonly evident on telephone lines, in which a ground return is used, pro-ducing sounds in the receiver which resemble in a remarkable degree the

"Similar changes are probably oc curring in terrestrial magnetism, but measured or photographically re-corded without great difficulty, thus admirably supplementing the mag-netic measurements. With ample measurements of these magnetic, earth-current and radio effects over the same interval of time and in the same general region, doubtless much

same general region, doubtless much of both practical and theoretical value may be learned.

"The resistance offered by the ground at the surface of the earth to the flow of electricity also plays a part in the transmission of radio waves, and such knowledge of this property of the earth as may be obtained by resistivity-surveys, similar to those made by the department of terrestrial magnetism of the Carnegle Institution of Washington as part of a study of earth-currents, would doubtless indicate the reason for unfavorable reception in certain directions from some radiocast stations and even in all directions from a few."

CHRISTIAN SCIENCE LECTURE Robert Stanley Ross, C. S., New York City, will lecture at Fifth Church of Christ, Scientist, Brooklyn, N. Y., Aug. 22, at 8 p. m., easter daylight saving time, under the auspices of Christian Science Churches of Greater New York. WMAC will radiocast this lecture on a frequency of 810 kilocycles.

BELGIAN CONGO CENSUS

BRUSSELS (Special Correspondence)—According to statistics, the

BRUSSELS (Special Correspondence)—According to statistics, the white population of the Belgian Congo has now reached 15.230, of whom 9638 are Belgians and the remaining 5598 are of foreign extraction. Of these 1148 are Portuguese, 801 Italians, 775 British, 512 Greeks, 454 French. \$20 Americans, 395 South Africans, 309 Dutch, 234 Swiss and 107 Swedes. Most of the white population reside in the Katsings.

The this reports is true this motor meets one of the objectives of the aeronautical engineering profession, which is a motor weighing one pound or less per horsepower. Even though the second largest tarm home radio audience in America, this station is heard consistently in the Northwest will establish a precedent as being the first air-cooled motor ever used in this seaplane classic of the world.

The Sovietizing of Radio

AVIATION By VOLNEY D. HURD

MIDST the clamor and cheering which is following the arrival of the Dole \$25,000 prize-win-ning fivers to Honolulu, one outstanding fact is apparent as the smoke clears away and that is that radio must be considered as part of the standard equipment of all airnlanes fiving any great distances.

planes flying any great distances. The plane that won had radio. The plane that came in second had only

one real complaint and that was its lack of radio.

A radio beacon was in operation shooting its beam across the Pacific during the race and Arthur Goebel,

to the ships from either direction following the same beam. With regu-

lar travel along air lanes equipped with radio beacons, a definite altitude range could be given to planes going in one direction and another range to planes going in the opposite direction. Thus, for example, the

powerful motor previously used was the F. I. A. T. 830 horsepower job which pulled the Italian Macchi sea-

plane to victory last year. Four carburetops are used on this Packard

MANY stories and photographs of radio expositions have come and gone, but this is the first photograph of a Russian exhibit that has come to hand. The Soviet Government is sponsoring the dissemination of radio information in the highways and byways of its domain, and government expositions, which are in reality radio schools, are being held in all the principal centers of the country.

The above photograph is typical of "radioites."

These expositions, which are attracting much attention. Of particular interest is the large sign in Russian at the top of the photograph. The value of this is probably lost on the majority of our readers, but perhaps it looks as intelligent as our diagrams and technical explanations appear to the general news reader who happens to stumble on them from time to time. We might say Russian to the Russians and radio to the "radioites."

V. D. H.

Many people, considering the radio beacon which sends a beam across space, have asked if this method would not cause collison due the the beach words and space.

A coming Schneider cup races for the world's fastest seaplane. The United States had won this cup several times, but last year the Italians took it back home with a beautifully designed monoplane. No newly developed American ships were entered in the competition. No official government entry has been arranged for this year, but Lieut. "Al" Williams, winner of many speed races, is entering a machine which should certainly make interesting competition for the British and Italian entries.

This machine is a small compact biplane. The center of interest is the power plant, a Packard X 2750 motor of 5% inches and a stroke of 5 inches. The cylinders having a bore of 5% inches and a stroke of 5 inches. The cylinders are arranged just like the letter "X" with six cylinders in a line for each of the four arms of the "X." This engine, while rated at 1200 horsepower has developed 1230 in tests. The most powerful motor previously used was the F. I. A. T. 830 horsepower job the state of the four arms of the "X." This engine, while rated at 1200 horsepower has developed 1230 in tests. The most powerful motor previously used was the F. I. A. T. 830 horsepower job according to many critics. Mrs. Baker has also had the distinction of having been the first woman violinist to play with the San Francisco Symphony Orchestra.

During the night of July 9, A. Pratt cabled from his home in Honolulu to KFI. Los Angeles, saying that he was receiving the Midnight Frolic with no interference and requesting Helen Guest to sing a song for him. The request was compiled with, and for a week or two the incident was forgotten by KFI officials. Then came a letter from Mr. Pratt giving the complete log of that station for 3½ hours which was found to check exactly with the program log kept by the announcer. While it is not unusual for KFI to be heard in the islands some 2600 miles distant, the length of time it was heard clearly without fading is considered remarkable for midsummer DX-ing.

Radio station WOWO at Fort Wayne, Ind., and within 16 miles of the United States center of population, today was added to the Columbia Broadcasting System Network covering the United States east of the Rocky Mountains. This station is the most powerful of the 17 stations in Indiana, and has equipment capable of sending programs out on the air with the strength of 12,000 watts. Besides the immediate territory, which includes Indiana, and the second largest farm home radio audience in America, this station is heard consistently in the Northwest and parts of Canada.

A radio beacon was in operation shooting its beam across the Pacific during the race and Arthur Goebel, by constant checking with this was able to fly directly to his goal. Martin Jensen, winner of second place, said he would have come in first if he had had radio equipment, because he spent three hours flying around in circles until the sun was obliging enough to come out so that his navigator could get their bearings and send them on their way again.

This song was composed and first published in Germany under the title man, and Adrian de Sylva wrote the words of the English version. When he stated to accept radio navigation have been won over.

Many people, considering the radio beacon which sends a beam across space, have asked if this

and for his appearances with Sousa's and other large bands, and for his Listeners-in around Buffalo will welcome the announcement that the A & P Gypsies who radiocast last season through the Red Network of the National Broadcasting Company, but have never been heard through station WGR, will this season add this Buffalo station to their going in one direction and auditer range to planes going in the opposite direction. Thus, for example, the eastbound planes could fly at 2000 feet and the westbound planes at 4000 feet.

Tremendous interest surrounds the coming Schneider cup races for the Monday from 9 until 10 o'clock.

The Columbia network, whi be a through station WGR, will this season add this Buffalo station to their itinerary during their weekly cruisings about the globe. The Gypsies will make their debut from WGR when they return to the air on Monday from 9 until 10 o'clock.

The Columbia network, whi be a highly valuable member of the 22-tone time as the planes of the Columbia network, whi be a highly valuable member of the 25-tone time as the planes of the 24-tone time as the planes of the 25-tone the planes of the 25-tone time as the

eter, Mr. Glantz is gifted with a remarkable memory, and he knows not only the trumpet parts, but also complete scores of an extensive repertoire. He has, too, a resourcefulness which in combination with his other abilities has made him the hero of many uunusual situations.

Among these is the time when, playing with a big symphony orches-tra before a record crowd in the New York Stadium concert series, the lights went out. It took only the fraction of a second's quick thinking to picture to Giantz the catastrophe of a hundred-odd leaderless musicians in such a moment. His vast musical memory came to his aid. The players could not see their leader in the blackness, but they could hear, and after the lights went out. The clean tones of the trumpet substituted for the moving baton. As though noth-ing had happened, the big orchestra played away with the substitute con-ductor until the lights came on again.

Dr. Craig has prepared the following brief discussion of his recent invention for the Montron. As stated in our previous articles on the application of bismuth to radio, this interesting possibility is exidently still far in the future, and Dr. Craig upholds this contention in his last pagagraph.

V. D. H. his last paragraph. V. D. H.

velop Idea

By PALMER H. CRAIG By PALMER H. CRAIG

Considerable confusion has been caused recently by conflicting accounts of the author's invention dealing with the "Hall Effect" and its use in radio and similar applications. It is with a view toward correcting these inaccurate and frequently erroneous reports that I write this brief account of the true status of the brief account of the true status of the The Hall Effect, discovered in 1880,

The Hall Effect, discovered in 1880, is an electromagnetic phenomenon in which a potential is produced between contacts at the center of the lengthwise sides of a rectangular sheet of metal when that strip carries a current lengthwise and is placed in a magnetic field perpendicular to its surface. No practical use has ever been made of the effect because the voltages produced are usually of a very low order of magnitude, being in general cases only a few micro-volts (millionths of a volt).

The writer found difficulty in controls the flow of power from a local battery (comparable to the vacuum tube plate battery) consequently the device was acting in the same way as a vacuum tube to produced use power amplification. It is a matter of long research to bring this device to perfection. The development of this invention is probably also a matter of years, but the future holds great prospects. At the present time some of the minor applications of the invention are about to be marketed, such as its use as a rectifier.

How Is Your Roof? Dallas News: Have you a goodlooking roof? What sort of impression does it make from the sky? Suppose a friend dropped in on you from an aerial jaunt, what would he

think of your taste and your archi-

tect's skill?

Smile at these questions if you wish, but the time may come when you will be concerned about them. Aviation is putting the third dimension into landscape gardening. It is calling for the redesigning of roofs. Why they are even considering the remaking of cities so that aerial passengers will carry away pleasant impressions of the towns underneath.

underneath...

Germany is already considering such things. Lufthansa, the famous flying corporation, is taking up architects to show them what is required to make Germany beautiful from the air. Dirty courts, ugly building outlines, unfortunate grouping of building—all these things stand out with startling clearness when viewed from above. Slumming by airplane sounds unusual. But it is said to be effective in conveying the maximum impression in the maximum impression in

Toledo Blade: It's not so easy to interpret a vacation postcard which reads: "Wish you were here; going to leave in the morn-ing."

CHOICE OF SETTLERS

Le Canada: The Government must exercise intelligence in choosing the settlers who are most likely to assimilate the Canadian national sentiment. These thousands of strangers whom we receive in our country each year and to whom we give the rights of Canadian citizenship, will change or affect our national character if we are not constantly on the alert concerning the selection, the number and source of these settlers.

#### International Labor

FOR a long time it has been known that there has been serious disagreement within the International Trades Union Congress. This congress represents the anti-Communist section of the Trade Union movement and is in a large majority throughout Europe, excluding Russia. It has consistently refused to have anything to do with Russia. The British Trades Union movement, on the other hand, while also anti-Communist, has objected to the total isolation of Russia and has endeavored to find some basis of associa-tion between the Communist and the Socialist Internationales. It has done so partly on the ground that such association would tend to moderate the policy of Russia and partly on the ground that the labor forces of the world could not afford to be divided in the face of a united capitalism. The disagreement has now come out into the open at the annual conference of the International Trade Union Congress just held in Paris.

It was brought to a head by a speech by A. A. Purcell of the British delegation which is exceptionally interesting as showing how the advanced wing of trades unionism is thinking about international problems today. Mr. Pur-cell pointed out that both Capital and Labor were becoming more and more international. Capital was flowing freely all over the world and was tending to organize industry more and more in those countries in which labor was plentiful and cheap and governmental restrictions were few. Labor, on the other hand, was seeking more and more to migrate from overcrowded countries with a low standard of living to countries in which wages were high and employment sure, though these countries were increasingly setting up barriers to their entry. Economically the world was more and

more becoming one.
In Mr. Purcell's view the Trades Union Internationale had become too narrowly European. The advent of capitalist enterprise in Asia and Africa was rapidly forming an industrial proletariat in these continents also. This proletariat, thanks to the printing press and easy travel, was becoming rapidly socialized. "The ideas," he said, "of Karl Marx are now as free, as accessible, to the peasants and workers of central and farther Asia, the fellaheen of Egypt, the Negroes of South Africa, the natives of Java and the liberated peons of Mexico, as they were to the tollers of the big cities of central and western Europe a generation ago."
The real competition for the workers of the West would come, he believed, from the exploited workers of Africa and the East. It was ime for European trades unionists to face the facts and bring their policy up to date, to get into touch with these new labor forces and to cease a policy of isolation from Russia which not only divided the labor world but left Asia at the mercy of the unrestrained organizers of

Whether Mr. Purcell and his friends will be able to bring about a united trades unionism and the basis of a world-wide fight against capitalism on a program half way between that of Moscow and that of the present International Trades Union Congress seems doubtful. The gulf between the Communists and the moderate Socialists seems to be widening rather than lessening. Moreover, labor all over the world, while not less wedded to the general ideal of economic freedom which underlies Socialism, seems to become more and more convinced that nationalization as a practical policy offers no solution of Labor's problems. None the less there is much force in the facts which Mr. Purcell brings forward. Nearly all the problems of the modern age are international n character. The old gulf between East and West is breaking down. Large-scale industry and organized labor movements are appearing even in darkest Africa. These facts may not have all the significance which Mr. Purcell believes, but they are facts of the utmost importance which all students of modern international problems would do well to consider.

#### Popular Favor or Larger Revenues

TO FIND the traffic of an important group of American railroads decreasing is unusual Yet in the Northwest this is the case in respect to several of the leading lines. Causes for this reduced volume of traffic are variously ascribed to the depressed condition of agriculture during recent years, to a lack of sufficient population in the territory served by these carriers, and to the competition of water lines operating through the Panama Canal.

Vast areas of land in the Northwest are not tenanted, and as a result the railroads have miles of unproductive lines, the operating costs of which, as well as the carrying charges on the invested capital, must be earned from the sections which do supply these roads with traffic. Due to the absence of traffic originating on the lines of the northern transcontinentals for long stretches of their respective routes, the need for an "overhead" traffic is apparent. Such tonnage would obviously be that which moved through to coastal cities, and would thus compete with that borne by the intercoastal steamship lines going through the Panama Canal.

To attract this tonnage, the railroads would be obliged to make rates which would, if not actually meet the water rates, at least come within striking distance of them. The slight difference would be compensated for by the

faster rail service. It would be manifestly impossible, however, to reduce the rates to the interior as well as to the coast; and the interior points, being removed from the Pacific, must even now pay a higher rate than the seacoast cities for the "back haul" railroad charge on their materials brought from the East by water and then moved inland by rail.

Despite the natural barrier erected by their distance from the sea, strenuous objections are made in this "intermountain territory" to any proposal that rail rates be made on a "long-andshort-haul" basis—that is, lower to seaboard than to an interior point where the shorter distance is contained within the longer.

Having tried, unsuccessfully, on several occa-sions to obtain these rates (which were effec-

tive prior to the war), the railroads have deemed it advisable to refrain from making further attempts, the clearest expression on this point having been made by the president of the Northern Pacific Railway, Charles Donnelly, in Northern Pacific Railway, Charles Donnelly, in Chicago, several months ago. At that time he observed: "While I believe these rates were beneficial to the carriers and detrimental to no one, we would not wish to incur the displeasure of the people of a vast region by the renewal of an application."

The question of lower rates to permit the rail lines to compete with the water lines on coast-to-coast business rests here at present. As Mr. Donnelly says, it appears "beneficial to the railroads and detrimental to no one" that such rates be made, since they do not change any existing rate relationship. Whether the attempt to obtain such rates is worth incurring the ill will of the shippers of the "inland empire" is indeed a question of determining whether popular favor is not of more true value than increased revenues.

#### Why Chronicle Chiefly Evil?

ISCUSSING Mexican affairs before a round table at the Williamstown Institute the other day, a college professor who is an authority on international relations offered the suggestion that these relations would be greatly improved and kept more consistently harmonious if the people of different countries would only tell the good things about each other instead of continually harping on those points of difference which seem to illiberal mentalities always to indicate weakness or worse on the

part of foreign people.

The suggestion is so obviously sensible that it scarcely needs discussion, and yet the policy which it would impose, particularly upon the press, is almost revolutionary. What is sought out for chronicling in the newspapers is apt to be the abnormal, the sensational, the provoca-tive. The press of no single country is unique in maintaining this hurtful policy. It is as apparent in the American news cabled to European papers as it is in the European news which appears in some of the American papers. It is a steady and continuing policy of thus chronicling those things apparent in foreign lands which most shock or antagonize local readers. which most shock or antagonize local readers. And because it goes on steadily, largely to the exclusion of the more important news, the effect is to produce in the thoughts of the people of one nationality stereotyped impressions, which are utterly false, of the characteristics of the peoples of foreign lands.

How much the late war was due to the mistaken concentless of foreign needlest impleated.

taken conceptions of foreign peoples, implanted in the thoughts of Germans and French, Austrians and Serbians, Russians and Hungarians, by an ultra-nationalistic press, might be a study worth the attention of some of the historians now engaged in trying to fix the responsibility

There is a real and a heavy responsibility resting upon the authoritative heads of news papers which publish foreign correspondence, and upon journalists stationed in foreign lands who furnish this news. Such endeavors to impress furnish this news. Such endeavors to impress upon the thoughts of the newspaper fraternity a sense of this responsibility as was made at Williamstown deserve to attract attention, and if properly considered cannot that to produce

#### Parliaments and World Peace

NONFIDENCE in the efficacy of the Inter-, parliamentary Union, as an instrument for the maintenance of peace throughout the world, was somewhat shaken when it was found that this body was unable to impress itself, through its various national groups, on the gov-ernments of Europe in 1914. Nevertheless, a lesson was learned, both through what the conflict itself brought home to the different nations involved, and through its after-effects, and when the twenty-fourth conference of the Interparliamentary Union meets in Paris, during the latter part of this month, certain matters are to be discussed that should help to lessen the possibility of future wars.

It is especially gratifying that the conference of this year is taking place on the invitation of the French group, with the full support of that government. The sittings are to be held in the Senate, the Palais du Luxembourg. As president of the American group, Theodore E. Burton, member of the House of Representatives,

will head that delegation.
Glancing over the agenda of the conference one sees that "Debate on the Technical Plan for a Reduction of Armaments" occupies a foremost place on the program, the entire day of Monday, August 29, being set apart for the purpose of discussing this vitally important question. Of the other outstanding subjects to be discussed, "The Fight Against Drugs of Addiction" is of

international importance.

While the Interparliamentary Union may not as yet have attained its fullest usefulness, there can be little doubt that the earnestness with which the national groups are entering into the labor of the whole has earned the body the respect of the world. The Paris conference should advance the Union another step forward.

#### The Benefits of Rural Education

ORE than one expert on rural problems is In confusion regarding the proper adjustment of the farm to the changed conditions of the present day. Economists, political scientists and rural technicians have seldom agreed in their diagnosis of the needs of the rural community. Economists discuss price fixing and co-operative marketing as a panacea for the improvement of rural conditions. The political observer sees deliverance for the farmer and his family in the ballot box and in certain legislative correctives. May it not be, however, that what is most vitally needed is a comprehensive and far-reaching program of rural education?

That, at least, was the conclusion reached by many of the prominent educators who attended the recent Toronto gathering of the World Federation of Education Associations, one of the recurring themes of that epochal conference being that of rural education. The need for this is felt more keenly perhaps in certain European and South American countries than in the United States. Prof. Moises Saenz, Assistant Secretary of Education of the Republic of Mexico, for instance, referred at Toronto to the extensive program of rural education now being undertaken in his country. He explained the pedagogical program of the itinerant educators who are sent into the remote and hitherto neglected villages of Mexico, giving to the peons a glimpse of a higher and more advanced community existence.

Then, too, Denes Janossey, of the Ministry of Education of Hungary, declared that a similar campaign of rural education was in progress among his people. G. Howard Ferguson, Prime Minister of Ontario, gave to his hearers at Toronto some convincing figures reflective of the interest being taken in rural education all over the Dominion of Canada. Dr. Sidney Wei of Peking likewise affirmed that the social and international solidarity of his country could not be accomplished unless an heroic effort were made to lift the standard of literacy among the millions of Chinese rural folk. And in the United States many problems in the field of rural education yet remain to be solved.

Increased leisure will result from the wider use of modern farm machinery and other laborsaving devices. An intelligent and constructive program of rural recreation will be necessary to meet this particular aspect of the rural problem. The fine arts and all the other cultural elements of a liberal education must in some way be made available to the farmer and his family without the consequent necessity of forsaking the plow and migrating to the college campus. Then the work of tilling the soil, of planting and harvesting crops, and of living in partnership with nature, will again become invested with a deep and genuine sense of satis-

#### Working His Way Through College

AN INTERESTING change in American habits and letters is suggested by a recent article on vacation and part-time employments for college undergraduates. One remembers a period when the author of books for boys found inspiration in the ambitious lad who must needs "work his way" through college. The lad was ready and willing to work, and the author found a job for him, or perhaps several, according to the amount of space available to get him through college. College populations were smaller, and there were fewer undergraduates actually working their way through. But with the growth of colleges and the increasing number of such students, the colleges have more and more taken over the author's job, not to enrich juvenile literature, but, within reasonable limits, to enrich undergraduates. System has supplanted imag-ination, with the result that there are now more occupations in which ambitious young men are working their way through college than the

most ingenious author could have imagined.

An actual list of such occupations is so long that it has to be printed alphabetically from "accountant" to "yacht club manager." It has even happened that ambitious youth has secured work as a detective and pursued collegiate education by pursuing criminals. Many, of course, become tutors, but here, too, the times have changed and the field of opportunity broadened. Successful business men, it appears, engage tutors, who give them "instruction in conversation and what you might call 'general culture.' This seems almost like a new profession for the tutor, and a new modesty for the successful business man. Not thus bravely, even if he sus-pected it, would a successful business man of the past have admitted a personal deficiency in conversation and general culture; nor thus humbly have employed a college undergraduate

to converse with and generally cultivate him.

What is lost to letters—and perhaps not lost, for the authors may already be adapting themgained elsewise. It is a good thing for the ambitious lad to have so many employments open to him. It is a good thing for the employments to have so many ambitious lads in them. And it is a good thing for successful business men-or anybody else, for that matter-to improve in conversation and general culture

#### The Diary of a Political Pilgrim

THE session of Parliament which opened six months ago has adjourned at an unusually early date, and members have hastened away to various sections of the globe for the holidays. They will reassemble for a short session in the late autumn. What has been the net political upshot of the session, and what has been its effect on

the position of the parties?

The principal events of the session have been the passing of the Trades Union Bill, the breach with Russia, Mr. ing of the Irades Union Bill, the breach with Russia, Mr. Churchill's budget, the proposals for the reform of the House of Lords, and recently the naval disarmament conference at Geneva. None of these events has added particularly to the prestige of the Government, and some have definitely lowered it. They have not on the other hand added particularly to the prestige of the opposition

parties, except indirectly.

The Trades Union Bill was popular with the Conservative rank and file, in fact it was introduced largely in response to their demand. In its broad outline it was popular rather than unpopular with that indefinable thing called public opinion. People were rather glad that the Government had had the courage to stand up to the trades unions and legislate against a general strike, against intimidation, and against other abuses which helped to produce the general strike of last year.

On the other hand the details of the bill were severely criticized in Parliament and have undoubtedly aroused bitter feelings among trades union leaders on the ground that while nominally protective of the community, they were in fact repressive of the legitimate rights of the workers. Big business, too, has been generally against the bill on the ground that what really matters is industrial

bill on the ground that what really matters is industrial peace and co-operation between Capital and Labor, and that the new act has been a hindrance to both.

It has been much the same story with the budget. Mr. Churchill's third budget was undoubtedly popular at first. People were immensely relieved that there was to be no new taxation. But second thoughts were less favorable. It was a budget of dexterity rather than of sound finance, a postponement rather than a solution of the financial problems involved. There has also been a combined attack on some of the income tax clauses.

The breach with Russia was popular, and the action of

the Government in sending troops to China last January was vindicated by the events. But the aftermath is not so satisfying. The breach with Russia tends to lessen trade and to make for international difficulties. The maintenance of troops in China is expensive and does nothing to and Chinase chaos.

tenance of troops in Callia.

to end Chinese chaos.

The proposals of the Government for the reform of the House of Lords, moderate as they were, produced a storm, but from within not from the country or the opposition, but from within the Conservative Party itself. Nearly half the party made any proposals which involved the entremement of the hereditary system in the Second Chamber.

Finally, there is an uneasy feeling that the Geneva naval conference has been bungled. There was little public discussion of the issue while the conference itself was citting. But now that it has broken up, public opinion, while supporting the attitude of the Government that Great Britain cannot reduce the fleet below what is necessary for the protection of its scattered units, undoubtedly feels that an agreement ought to have been reached comehow. It has not, however, yet decided where the redi responsibility for the lack of results lies.

Notwithstanding this catalogue of events, none of them

Notwithstanding this catalogue of events, none of them very cheering to the Conservative Party, there is no sign of any general decline in the position of the Government. By-elections have on the whole gone against it, but not more than is customary when a government is in its third year of office or when it has so large a majority

based on a minority vote. It is clear that public opinion is not yet seriously considering the possibility of a change

is not yet seriously considering the possibility of a change of government.

On the personal side the position is much the same. Mr. Baldwin has declined in prestige because he clearly has neither drive nor imagination in the practical affairs of government and is chairman rather than leader of his Cabinet. On the other hand most people like his simplicity and honesty of purpose, and he has no rival for the premiership. His principal supporter among the press, The Times, put the position well when it said recently: "What really matters is that those about him should be in full agreement with his general course of policy, which is always sound when it can be detected."

Among the rest, Mr. Churchill, Lord Birkenhead and Sir William Joynson-Hicks, are the "enfants terribles" of the Cabinet, the controversial figures who get it into trouble but who also keep it in that flood of limelight which is essential to popularity and prestige. Sir Austen Chamber-lain is trusted for his sincerity, but of late he has been criticized for receding a little from the progressive force which helped so largely to produce Locarno. The other figures in the Cabinet have not come much to the front of late.

is always sound when it can be detected."

of late.

But if the Government has not gone up in popular esteem the Labor Party has certainly fallen. It is at the bottom of the reaction from its disastrous policy of last year, the general strike and the mining strike. It made a feeble fight in the House of Commons against the Trades Union Bill, and its campaign in the country fell flat. It is deeply divided within itself. It has no policy save Socialism, which its own leaders no longer consider practicable. But here, too, its failure during the past session has little electoral importance. Just as the Conservatives are the party of property and tradition, so Labor is the party

the party of property and tradition, so Labor is the party of the trades union and the workingmen. Both parties can count on a solid mass of voters, whatever their mistakes and whatever their popularity. Though Labor is in low water it will almost certainly win a considerable number of seats whenever the next general election comes.

The party which has undoubtedly done best in the last few months has been the Liberal Party. It won some notable by-elections just when everybody thought it was

notable by-elections just when everybody thought it was a past issue. It has put forward a progressive program on practical as against theoretical grounds for dealing with agriculture, with coal and electricity and is about to publish its proposals about industry. It is beginning to draw to its ranks the discontented from both the other parties. It possesses more administrative ability and experience than the Labor Party can show.

On the other hand its electoral position is inherently weak. No great organized class is behind it, as property is behind the Conservatives and the trades unions are behind the Labor Party. It is in that hazardous and difficult position, the middle position, attacked from both sides. Its future really depends upon whether it can come to terms with Labor, so that the two parties do not offer opposing candidates in the constituencies, and there is little sign of such an arrangement at present. It seems to have no chance of ever winning a majority on its own account.

account.

The broad judgment, therefore, would seem to be that from the political standpoint things are very much as they were at the beginning of the year, except that the Conservatives and Labor have gone down somewhat in popular esteem and the Liberals have gone up somewhat, though in no case has the movement been sufficient to make any striking change in the electoral prospects of the parties. To bring about such a change an electoral compact between Liberals and Labor is necessary. But as there seems to be no likelihood of a general election for at least a year that possibility need not be considered now.

#### Notes From Geneva

THE Swiss Society for the Protection of Birds held its annual meeting this year at Villeneuve, and organized an interesting visit to a colony of waterfowl, of which there are many varieties on Lake Léman. Owing to the efforts of the society and the excellent laws which have been passed for the preservation of birds in Switzerland, they are far more numerous here than in France or land, they are far more numerous here than in France or Italy. The peasants have been taught their value, and know that if they destroy insectivorous birds, their crops will suffer. They realize in many parts of Switzerland that, even if birds take their small toll of fruit, or grain, or saidly produce they do far more good than harm by or garden produce, the do far more destroying grubs. This knowledge of bird habits is of course not universally shared by the Swiss, but the educa-tion of the children in the schools in the value of birds, and the great pleasure which may be obtained from observing them, has done a great deal to make Switzerland a sanctuary for birds. How wise this instruction is, not only from the moral, but from the material viewpoint may be seen in the comparative freedom of Swiss fruit and vegetables from insect ravages, which is quite different from what is the case with many of the peaches and plums which come from France or Italy + + +

The ancient game of bowls is still played at many of the village inns of Switzerland. On Sunday afternoons in particular, the villagers may be seen assembled round the bowling green, which is indeed not, as a rule, a green at all, but merely a rough makeshift at the side of the road, where much-battered ninepins stand to receive the shock of wooden balls, which have long since lost their pristine shape. But these primitive games give enormous pleasure to players and watchers. And one is glad to note that the game keeps its simple rustic state, unaecompanied by betting. Of course in the towns the bowling green is a much more important affair, and there are said to be some of the best in Europe in Switzerland, which likes to think that it can beat every other country at the game. Hence the interest with which the suggestion has been received by the Swiss that an international bowling club shall be established for the encouragement of international

The automobilist may grumble at some of the restrictions which are placed on motoring in Switzerland, where the right of the public to take their walks abroad on Sunday without the liability of meeting the "scorcher," is more strictly preserved than in some other countries. But the low speed limit which is ordained for Sunday is But the low speed limit which is ordained for Sunday is strictly enforced only in the neighborhood of towns and villages, and in the open country the twenty-five kilometers an hour can be exceeded without much risk of incurring a gendarme's weath. And as for other restrictions, since the Swiss public itself rejected the proposal for compulsory increase of insurance rates against third-party risks, the Swiss cannot be accused of wanting to discourage motor traffic on the roads. The municipal authorities recognize that the automobile is a good source of income, and have done much by the skillful arrangement of the traffic to make motoring easier in the crowded thoroughfares of Swiss towns. The one-way system where streets run parallel, has also worked very well.

Geneva has already become an important aviation center, with a daily service of airplanes carrying passengers to many parts of Europe. And now there is talk of the League of Nations extending the aviation ground near the Palace of the Nations in order to provide for the rapid transit of members of the Council of the League to Geneva in times of crisis. The committee of experts which met at Geneva at the end of July to report on the subject made a careful examination of the Cointrin airdrome, and there is no doubt that this would lend itself to the purpose,

GENEVA

which the council had in thought in adopting the report
on Article 11 of the Covenant, the article under which
preventive measures may be devised against war. But it
will hardly be necessary to keep special airplanes for the
service of the League. An arrangement it is thought could
be fixed up with existing companies, which in case of
the transport of the League.

Trance or
a realize and

It is said that there are more than 2000 fêtes held every year in Switzerland. These include the local festivals, which celebrate the memory of local saints and heroes, whose names and exploits belong to a legendary past. Thus the country folk come into Geneva to take part in the fête of St. Gervais, as they have done from time immemorial. And they dance in the streets to the raucous music of the hurdy-gurdy, while the merry-go-rous the cheap-jack add to the gayety of the scene. But the most attractive fêtes of all are those which are held in honor of the children. One of the prettiest of these, called the "Festival of Youth and Gladness," took place at St. Gall recently. All the young people, between the ages of six and nineteen, walked in procession to a neighboring hill, there to sing chants in honor of their native town and country. Boys and girls alike were dressed in white, the girls carrying garlands of flowers, while the tallest of the boys formed a guard of honor with "halle-bardes and arbaletes." The procession numbered 8000 and was a beautiful spectacle.

## Letters to The Christian Science Monitor

Brief communications are melormed, but The Christian Felance Moni-tor Relitorial Board must commin sols judge of their cuttability, and this Board date not hold itself or this nanopaper responsible for the facts or opinious presented. Anonymous letters are destroyed wareds.

#### A Product of Prohibition To THE CHRISTIAN SCIENCE MONITOR:

A well-dressed young bond salesman called on me re-cently, and introduced himself as a former pupil. At first I hardly placed him, but he reminded me of his brother and other classmates, and I soon recalled him and his family. He told me of his college work and of post-graduate study in Harvard, and of business success. His brother, he said, was practicing law in one of our thriving

mid-west cities.

Here, thought I, is a product of prohibition. When this young man and his brother were my pupils, their father was a bar-keeper; the brother, about fourteen years old then, plucky, pugnacious and irritable, was being brought up to be a pugilist, and frequently amused pool-room loungers, in amateur bouts with other boys, with ensuing loss of time in school as a rule.

Local option came in our county. The father went to Detroit to go on bar-keeping and I lost track of the family. Today I heard of the return of the family to our family. Today I heard of the return of the family to our town after national prohibition came in, and of the education and progress of the boys, of the father's occupation as foreman of a department in one of the large mills here. I can only say that this family was not headed toward college and successful professional careers under preprohibition conditions.

In those days before local option the teachers in the school where I taught felt obliged to contribute money to a fund to buy food for pupils whom we know were coming to school hungry, and whose fathers, as we also knew, were saloon patrons. I am still teaching, and in a school in the

saloon patrons. I am still teaching, and in a school in the poorest district of the city. Perhaps some of the pupils are needy, but the teachers have not been able to find such cases, and have not needed to maintain the breakfast fund since 1920.

Bernice A. Perer.

Kalamasoo, Mich.
